ISO 23443:2020 (E)

Infant formula and adult nutritionals — Determination of β-carotene, lycopene and lutein by reversed-phase ultra-high performance liquid chromatography (RP-UHPLC)

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagents and materials

5.1 Reagents
5.2 Standards
5.3 Standards preparation

6 Apparatus

7 Procedure

7.1 Sample preparation
7.2 Chromatography
7.2.1 Chromatographic conditions
7.2.2 System suitability checks

8 Calculations

8.1 Determination of purity
8.1.1 General
8.1.2 Spectrophotometric purity (PS)
8.1.3 Chromatographic purity (PC)
8.1.4 Reference standard purity (P)
8.2 Concentration of each carotenoid in standard solutions
8.2.1 Stock solution concentrations
8.2.2 Apocarotenal working solution concentration
8.2.3 Apocarotenal intermediate solution concentration
8.2.4 Carotenoid concentrations in mixed carotenoid intermediate solution
8.2.5 Concentrations of carotenoid analytes in calibrations solutions
8.2.6 Concentration of apocarotenal internal standard in calibrations solutions
8.3 Calculate calibration curve
8.4 Mass of apocarotenal
8.5 Contents of all-trans-β-carotene, cis isomers of β-carotene and total β-carotene
8.6 Contents of total lycopene

9 Precision

9.1 General
9.2 Repeatability
9.3 Reproducibility

10 Test report

Annex A (informative) Example chromatograms

Annex B (informative) Precision data

Annex C (informative) Determination of lutein

C.1 General
C.2 Additional reagents and materials
C.2.1 Reagents and standards
C.2.2 Standards preparation
C.3 Additional system suitability checks
C.3.1 Resolution between lutein cis and trans isomers
C.3.2 Resolution between all-trans-lutein, all-trans-zeaxanthin, and apocarotenal
C.4 Additional calculations
C.4.1 Determination of purity
C.4.1.1 General
C.4.1.2 Spectrophotometric purity (PS)
C.4.1.3 Chromatographic purity (PC)
C.4.1.4 Reference standard purity (P)
C.4.2 Concentration of lutein in standard solutions
C.4.2.1 Stock solution concentration
C.4.3 Calculate calibration curve
C.4.4 Contents of all-trans lutein, cis isomers of lutein and total lutein
C.5 Precision
C.5.1 General
C.5.2 Repeatability
C.5.3 Reproducibility
