ISO 22948:2020 (E)

Carbon footprint for seafood — Product category rules (CFP–PCR) for finfish

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

3.1 Quantification of the carbon footprint of a product
3.2 Products, product systems and processes
3.3 Data and data quality
3.4 Greenhouse gases
3.5 Waste, storage and transport

4 Calculation and communication requirements

5 Methodological requirements

5.1 General
5.2 Functional unit or declared unit
5.3 Principles of data and methodological reporting
5.4 Impact assessment
5.5 System boundaries
5.5.1 General
5.5.2 The cut-off criterion: General rule for what can be excluded from the carbon footprint
5.5.3 General processes that can be excluded
5.5.4 System boundaries for waste
5.5.5 Use of recycled or recovered materials
5.5.6 Capital investments
5.5.7 System boundaries for fishing
5.5.8 System boundaries for feed production
5.5.9 System boundaries for products from aquaculture
5.5.10 System boundaries for processing
5.5.11 System boundaries for distribution to dealers
5.5.12 System boundary for final consumption
5.6 Data requirements
5.6.1 General
5.6.2 Rules for data sampling
5.6.3 Data on electricity
5.6.4 Data on fuel
5.6.5 Geographical delimitation
5.6.6 Time delimitation
5.6.7 Validation of data
5.6.8 Transport calculation rules
5.7 Allocation
5.8 Impact assessment
5.9 Interpretation
5.10 Fossil and biogenic carbon
5.11 Land use change
5.12 Land use
5.13 Carbon sequestration
5.14 Communication of carbon footprints for finfish
5.14.1 General
5.14.2 Details about the producer

Annex A (informative) Example of data collection in the calculation of the carbon footprint of finfish products from aquaculture and fisheries

Annex B (informative) Example of mass allocation for salmon co-product processing

Annex C (informative) Example of LCA seabass value-chain modelling

Annex D (informative) Example of LCA fish meal value-chain modelling

Annex E (informative) Example of LCA fish oil value-chain modelling for human consumption
