European foreword 4

Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Termsanddefinitions 7

4 Principle 11

5 Apparatus 13

6 Culture media and reagents 13

7 Study design and sampling 13
7.1 General 13
7.2 Setting target reduction level for the inactivation study 14
7.3 Number of batches 14
7.4 Preparation of the test units 14
7.5 Number of control units and test units 15

8 Selection of strains 15

9 Preparation of the inoculum 15
9.1 General 15
9.2 Preparation of the vegetative cells 16
9.3 Preparation of the spores 16

10 Inoculation of the test units 16

11 Controls 18
11.1 Uninoculated controls 18
11.2 Inoculated controls 18

12 Treatment of the test units 18

13 Analysis 18

14 Expression of the results 19
14.1 General 19
14.2 Inactivation potential 19
14.3 Inactivation kinetics parameters 20
14.3.1 General 20
14.3.2 Primary inactivation kinetics parameters 20
14.3.3 Secondary inactivation kinetics parameters 21
14.4 Simulation of inactivation 21

15 Test report 22
15.1 General 22
15.2 Aim of the study, type of challenge test and target reduction level 22
15.3 Experimental protocol 23
15.4 Sample analysis 23
15.5 Results 23
15.6 Conclusions 24
15.7 Reference documents 24

Annex A (informative) Selection of the type and the location of inactivation study 25

Annex B (normative) Minimum number of units to prepare for the inactivation studies 26

Annex C (informative) Examples of inoculation techniques 27

Bibliography 29
