DIN 10064:2023-05 (E)

Milk and milk products - Screening method for the detection of inhibitors

Contents

Page

Foreword ... 3
Introduction ... 4
1 Scope ... 4
2 Normative references ... 4
3 Terms and definitions ... 4
4 Detection methods and test systems for screening ... 5
5 Matrix of the inhibitors to be detected and the minimum limits of detection ... 5
6 Selection of detection methods and test systems for a sufficiently sensitive screening method ... 6
6.1 General ... 6
6.2 Microbiological test systems ... 6
6.3 Receptor test systems ... 6
7 Selection of the detection methods and test systems for the follow-up examination (basic requirements) ... 6
8 Identification of groups of active substances (optional) ... 10
9 Further qualitative and quantitative differentiation of inhibitors (optional) ... 10
10 Manufacturer testing of test kits used ... 10
11 Evaluation of test kits by users ... 10
12 Suitability of the test systems ... 10
13 Test report ... 11
Bibliography ... 12
