European foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 7

4 Requirements 8

5 Test methods 10
5.1 Principle 10
5.2 Materials and reagents, including cell cultures 11
5.2.1 Test organisms 11
5.2.2 Culture media, reagents and cell cultures 11
5.3 Apparatus and glassware 15
5.4 Preparation of test organism suspensions and product test solutions 17
5.4.1 Test organism suspension (test virus suspension) 17
5.4.2 Product test solutions 17
5.5 Procedure for assessing the virucidal activity of the product 18
5.5.1 General 18
5.5.2 Test procedure 19
5.5.3 Modified method for ready-to-use products 20
5.5.4 Cytotoxicity caused by product test solutions 20
5.5.5 Control of efficiency of suppression of product's activity 22
5.5.6 Reference test for virus inactivation 22
5.5.7 Titration of the virus control 22
5.5.8 Titration of test samples 23
5.6 Experimental data and calculation 23
5.6.1 Protocol of results 23
5.6.2 Calculation of infectivity titre (TCID50 or PFU) 23
5.7 Verification of the methodology 23
5.8 Expression of results 24
5.8.1 General 24
5.8.2 Calculation of the virucidal activity of products 24
5.8.3 Calculation of the virucidal activity against enveloped viruses 25
5.9 Test report 25

Annex A (informative) Viruses covered by virucidal activity claims described in this document 27

Annex B (informative) Detoxification of test mixtures 28

B.1 Molecular sieving with SephadexTM LH 20 28
B.1.1 Principle 28
B.1.2 Sephadex suspension 28
B.1.3 Procedure 28
B.2 Molecular sieving using MicroSpinTM S 400 HR 30

B.3 Determination of the residual virus titre by the large-volume-plating (LVP) method 30
B.3.1 General 30
B.3.2 Example for the calculation of titres and the reduction according to the LVP method 31

Annex C (informative) Calculation of the viral infectivity titre 33

C.1 Quantal tests -- Example of TCID50 determination by the Spearman-Kärber method 33
C.2 Plaque test 34
C.3 Biometrical evaluation of experimental approaches and assessment of the disinfecting effect on the virus (reduction [R]) 35
C.3.1 General 35
C.3.2 Calculating the virus titre 35
C.3.3 Calculating the reduction and its 95 % confidence interval 36

Annex D (informative) Presentation of test results of one active concentration 37

Annex E (informative) Preparation of the glutaraldehyde test solutions (v/v) 39
