Foreword ... **iv**

[A1] Foreword to Amendment 1 [A1] ... **v**

[A2] Foreword to Amendment 2 [A2] ... **vi**

Introduction ... **vii**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **2**

4 General principles of the single-laboratory detection or quantification method validation ... **4**
4.1 General ... 4
4.2 Principles of the factorial approach ... 5
4.3 Principles of the conventional approach ... 5

5 Technical protocol for validation — Factorial approach ... **7**
5.1 Qualitative methods ... 7
5.1.1 Single-laboratory method validation study against a reference method ... 7
5.1.2 Single-laboratory method validation study without a reference method ... 13
5.2 Quantitative methods ... 15
5.2.1 Single-laboratory method validation study against a reference method ... 15
5.2.2 Single-laboratory method validation study without a reference method ... 18

6 Technical protocol for validation — Conventional approach ... **19**
6.1 Qualitative methods ... 19
6.1.1 Single-laboratory method validation study against a reference method ... 19
6.1.2 Single-laboratory method validation study without a reference method ... 20
6.2 Quantitative methods ... 21
6.2.1 Single-laboratory method validation study against a reference method ... 21
6.2.2 Single-laboratory method validation study without a reference method ... 23

7 Summary of acceptability limits ... **26**

Annex A (informative) **List of factors and factor levels for factorial method validation** ... **27**

Annex B (informative) **Calculation of in-house reproducibility for qualitative methods based on the LOD_{50} study described in 6.1.2.3** ... **29**

Annex C (informative) **Example of a factorial single-laboratory method validation study for a quantitative method against a reference method** ... **30**

Annex D (informative) **Example of a factorial single-laboratory method validation study for a qualitative method against a reference method** ... **36**

Annex E (informative) **Example of a factorial single-laboratory method validation study for the variability of the LOD_{50} for a qualitative method without a reference method** ... **40**

Annex F (informative) **Determination of precision if the artificially contaminated samples are unstable** ... **43**

Annex G (informative) **Protocol for single-laboratory validation of alternative methods for microbiological confirmation and typing procedures** ... **45**

[A1] Annex H (normative) **Validation of a larger test portion size for qualitative methods [A1]** ... **46**

[A2] Annex I (informative) **Protocol for single-laboratory validation of identification methods of microorganisms [A2]** ... **51**

Bibliography ... **52**
