Foreword iv

1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Principle 3

5 Diluents 3
5.1 Basic materials 3
5.2 Diluents for general use 3
5.3 Diluents for special purposes 3
5.4 Distribution and sterilization of the diluent 4

6 Apparatus 4

7 Preparation of samples 4
7.1 Frozen products 4
7.2 Hard and dry products 5
7.3 Liquid and non-viscous products 5
7.4 Heterogeneous products 5

8 General procedures 5
8.1 General 5
8.2 Types of samples to be sent to the laboratory 5
8.3 Purpose of the analysis 6
8.4 General case for acidic products 6
8.5 High fat foods (over 20 % of total mass as fat) 6

9 Specific procedures 6
9.1 Initial preparation of the different types of samples 6
9.2 Procedure for manufactured products stored under refrigeration 7
9.3 Procedure for frozen meats 10
9.4 Procedure for partially dehydrated meat extracts 11
9.5 Surface samples (swabs and small cloths) 11

10 Further decimal dilutions 11

Annex A (informative) Frame for the delineation of a surface sample area 12

Annex B (normative) Means of sampling a frozen or deep-frozen test piece or block 13

B.1 Non-homogeneous block 13
B.2 Homogeneous test piece 13
