ISO/TR 22305:2006-06 (E)

Cigarettes - Measurement of nicotine-free dry particulate matter, nicotine, water and carbon monoxide in cigarette smoke - Analysis of data from collaborative studies reporting relationships between repeatability, reproducibility and tolerances

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Statistical functions for repeatability (r), reproducibility (R) of yield measurements and compliance tolerances for declared smoke constituent yields 1
2.1 Statistical functions for repeatability (r) and reproducibility (R) 1
2.2 A statistical model for compliance tolerances 2

3 Sources of data 3
3.1 International collaborative studies 3
3.2 UK Department of Health Cigarette Survey data 4

4 Comparison of 2003 CORESTA Collaborative Study data with those previously reported 4
4.1 General 4
4.2 Comparison of repeatability r20 values from CCS-03 with other collaborative studies 4
4.3 Comparison of reproducibility R20 values from CCS-03 with other collaborative studies 5
4.3.1 General 5
4.3.2 Relationship between reproducibility R20 and smoke constituent yield 5
4.4 Comparison of R100 reproducibility values from collaborative studies with measurement tolerances estimated from the UK Department of Health Cigarette Survey data 5

5 Review of information relevant to setting a compliance tolerance for carbon monoxide 6
5.1 General 6
5.2 Compliance data for current tolerances 6
5.3 Confidence intervals associated with yield measurements 6
5.4 Statistical models 7
5.5 Prediction of a tolerance for CO from the relative variability in their reproducibility values 8

6 Conclusions 8

7 Recommendations 8

Annex A (informative) Background considerations on the choice of sampling procedures 31

Annex B (informative) The determination of carbon monoxide in cigarette smoke -- Problems in the evaluation of results 33

Annex C (informative) Proposals from the UK Tobacco Manufacturers Association for a practicable tolerance for verifying cigarette packet declarations of carbon monoxide (March, 2002) 41

Annex D (informative) Analysis of bias measurements from the UK Department of Health Cigarette Survey 59

Annex E (informative) ASIA COLLABORATIVE STUDY #11 2002/2003 71

Annex F (informative) 2003 CORESTA Collaborative Study Report CORESTA study for the estimation of the repeatability and reproducibility of the measurement of nicotine-free particulate matter, nicotine and CO in smoke using the ISO smoking methods, September 2003 ..... **86**

Bibliography **146**
