Annex A (normative) Method to characterize the impulsive character of the noise		36
Annex B (normative) Tests at constant speed -- Special cases		37
Annex C (normative) Method to assess acceptable small deviations from acoustic rail roughness requirements		42
Annex D (informative) Guidance for light rail vehicles measurement		44
Annex E (informative) Comparability of test situations in terms of acoustic rail roughness		48
Annex F (informative) Additional measurements		51
Annex G (informative) Quantification of measurement uncertainties according to ISO/IEC Guide 98-3:2008 [8]		52
