

DIN EN ISO 13753:2008-09 (E)

Mechanical vibration and shock - Hand-arm vibration - Method for measuring the vibration transmissibility of resilient materials when loaded by the hand-arm system (ISO 13753:1998)

Contents	Page
Foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Definitions	5
4 Symbols	6
5 Principle	6
6 Measuring equipment	6
7 Test sample and mass m	7
8 Measurement procedure	7
9 Evaluation of results	7
10 Test report	8
Annex A (normative) Values of the hand-arm impedance ZH	9
Annex B (informative) Mathematical basis for the measurement of the vibration transmissibility of resilient materials	10
Annex C (informative) Full evaluation of equations (1) and (2)	12
Annex D (informative) Examples of calculations of the transmissibility T	13
Annex E (informative) Influences on the measurement results	14
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC, amended by Directive 98/79/EC	15
Annex ZB (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC	16
Bibliography	17
