ISO 362-2:2009-07 (E)

Measurement of noise emitted by accelerating road vehicles - Engineering method - Part 2: L category

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Symbols and abbreviated terms 6

5 Specification of the acceleration for vehicles of category L3 with PMR > 25 7
5.1 General 7
5.2 Calculation of acceleration 7
5.3 Calculation of the target acceleration 8
5.4 Calculation of the reference acceleration 9
5.5 Partial power factor kP 9

6 Instrumentation 9
6.1 Instruments for acoustical measurement 9
6.2 Instrumentation for engine and vehicle speed measurements 10
6.3 Meteorological instrumentation 10

7 Acoustical environment, meteorological conditions and background noise 10
7.1 Test site 10
7.2 Meteorological conditions 11
7.3 Background noise 12

8 Test procedures 12
8.1 Microphone positions 12
8.2 Conditions of the vehicle 12
8.3 Operating conditions 13
8.4 Measurement readings and reported values 16
8.5 Measurement uncertainty 17

9 Test report 18

Annex A (informative) Technical background for development of vehicle noise test procedure based on in-use operation in urban conditions 19

Annex B (informative) Measurement uncertainty -- Framework for analysis according to ISO/IEC Guide 98-3 25

Annex C (informative) Flowchart of the procedure for category L3 with PMR > 25 28

Annex D (informative) Flowchart for vehicles of category L3 with PMR u 25 29

Annex E (informative) Flowchart for vehicles of categories L4 and L5 30

Annex F (informative) Indoor test operation 31
