

DIN EN ISO 11200:2010-01 (E)

Acoustics - Noise emitted by machinery and equipment - Guidelines for the use of basic standards for the determination of emission sound pressure levels at a work station and at other specified positions (ISO 11200:1995, including Cor 1:1997)

Contents		Page
Foreword		3
Introduction		4
1	Scope	7
2	Normative references	7
3	Definitions	8
4	Selection of the appropriate International Standard for determination of emission sound pressure levels	10
4.1	General requirements	10
4.2	Quantities to be measured and determined	10
4.3	Considerations affecting choice of method	10
4.4	Synopses	10
4.5	Procedure for selection	10
5	Selection of specified positions	11
5.1	Specified positions	11
5.2	Microphone positions for bystanders and for unattended machines	11
5.3	Work stations inside cabs	12
Annex A (normative) Synopses of basic International Standards on determination of emission sound pressure levels		16
Annex B (informative) Bibliography		18
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC		19
Annex ZB (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC		20
