## Mechanical vibration and shock - Vibration of fixed structures - Guidelines for the measurement of vibrations and evaluation of their effects on structures

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		1
3 <b>Terms and definitions</b> .....		1
4 <b>Source-related factors to be considered</b> .....		2
5 <b>Structure-related factors to be considered</b> .....		3
6 <b>Quantities to be measured</b> .....		4
7 <b>Frequency range and vibration amplitude</b> .....		5
8 <b>Instrumentation</b> .....		5
9 <b>Position and mounting of transducers</b> .....		7
10 <b>Data collection, analysis and assessment</b> .....		10
11 <b>Methods of measurement and reporting</b> .....		12
12 <b>Evaluation of vibration responses</b> .....		14
<b>Annex A (informative) Values of structural response</b> .....		16
<b>Annex B (informative) Classification of buildings</b> .....		18
<b>Annex C (informative) Random data</b> .....		23
<b>Annex D (informative) Predicting natural frequencies and damping of buildings</b> .....		24
<b>Annex E (informative) Vibrational interaction of the foundation of a structure and the soil</b> .....		30
<b>Bibliography</b> .....		36
