ISO 10068:2012-12 (E)

Mechanical vibration and shock - Mechanical impedance of the human hand-arm system at the driving point

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Termsanddefinitions 2

3 Mechanical impedance of the hand-arm system at the driving point 2

4 Applicability of values of impedance 8

5 Applications 10
5.1 General 10
5.2 Evaluation of the transmissibility of resilient materials when loaded by the hand- arm system 10
5.3 Models of the hand-arm system 11
5.4 Estimation of power absorbed in the hand-arm system and its frequency dependence 11

Annex A (normative) Reference values for the zh-component of the mechanical impedance of the hand-arm system 12

Annex B (informative) Model 1 14

Annex C (informative) Model 2 19

Annex D (informative) Model 3 24

Annex E (informative) Model of the gloved hand-arm system 29

Annex F (informative) Examples of frequency dependence derived from vibration power absorption 32

Annex G (informative) Measurement of the mechanical impedance of the hand-arm system 36

Bibliography 37
