ISO 717-1:2013-03 (E)

Acoustics - Rating of sound insulation in buildings and of building elements - Part 1: Airborne sound insulation

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Procedure for evaluating single-number quantities 2
4.1 General 2
4.2 Reference values 3
4.3 Sound spectra 3
4.4 Method of comparison 3
4.5 Calculation of spectrum adaptation terms 8

5 Statement of results 8
5.1 General 8
5.2 Statement of performance of building elements 9
5.3 Statement of requirements and of performance of buildings 9

Annex A (informative) Use of spectrum adaptation terms 10

Annex B (informative) Terms and spectra for an enlarged frequency range 12

Annex C (informative) Examples of the calculation of single-number quantities and spectrum adaptation terms 15
