National foreword 4

National Annex NA (informative) Bibliography 6

1 Scope 7

2 Normative references 8

3 Terms and definitions 8

4 Capacity and performance data of the balancing machine 8
4.1 General 8
4.2 Data for horizontal balancing machines 8
4.3 Data for vertical balancing machines 12

5 Machine features 16
5.1 Principle of operation 16
5.2 Arrangement of the machine 16
5.3 Indicating system 17
5.4 Plane separation system 18
5.5 Setting and calibration of indication 18
5.6 Other devices 19

6 Minimum achievable residual unbalance 19

7 Production efficiency 19
7.1 General 19
7.2 Time per measuring run 20
7.3 Unbalance reduction ratio 20

8 Performance qualifying factors 20

9 Installation requirements 21
9.1 General 21
9.2 Electrical and pneumatic requirements 21
9.3 Foundation 21

10 Proving rotors and test masses 21
10.1 General 21
10.2 Proving rotors 21
10.3 Test masses 23

11 Verification tests 32
11.1 Requirements for performance and parameter verification 32
11.2 Duties of manufacturer and user 32
11.3 Requirement for weighing scale 33
11.4 Test and rechecks 33
11.5 Test speed 33
11.6 Test for minimum achievable residual unbalance, Umar 33
11.7 Test for unbalance reduction ratio, URR 37
11.8 Test for couple unbalance interference on single-plane machines 46

11.9 Compensator test 46
11.10 Simplified tests 47

Annex A (informative) Information provided by the user to the balancing machine manufacturer 48

Annex B (informative) URR limit diagrams 53

Annex C (informative) Shafts of outboard proving rotors type C 56

Annex D (informative) Modifications of proving rotors prepared in accordance with ISO 2953:1985[2] to this part of ISO 21940 58
