ISO 10816-8:2014-07 (E)

Mechanical vibration - Evaluation of machine vibration by measurements on non-rotating parts - Part 8: Reciprocating compresso r systems

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Measurements 2
4.1 Measurement procedure 2
4.2 Measuring instrumentation and measured quantities 3
4.3 Locations and direction of measurements 3
4.4 Operating conditions 9
4.5 Record of measured results 9

5 Vibration criteria 9
5.1 Measuring quantities 9
5.2 Evaluation zones 9
5.3 Guidance values for acceptable overall vibration values (2 Hz to 1 000 Hz) 10

Annex A (normative) Measurement information requirements 13

Annex B (normative) Curves with overall limits of vibration velocity values 16

Annex C (informative) Measurement of vibration values on the crosshead guide 22

Annex D (informative) Root-mean-square value, peak value, and crest factor 25

Bibliography 27
