

# DIN EN 16703:2015-12 (E)

## Acoustics - Test code for drywall systems of plasterboard with steel studs - Airborne sound insulation

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Test code for drywall systems of plasterboard with steel studs .....	7
4.1	Application .....	7
4.2	Testing Guidelines .....	7
4.2.1	Test element .....	7
4.2.2	Boundary and mounting conditions .....	7
4.2.3	Test report .....	8
4.3	Validation of the laboratory with two reference test partitions .....	8
4.3.1	Test elements .....	8
4.3.2	Acceptance criteria .....	8
4.3.3	Remedial investigation .....	10
4.4	Application of uncertainties .....	11
Annex A (normative) Reference test partition location in aperture .....		12
A.1	General .....	12
A.2	Case A "Aperture without niche and one acoustic break" .....	12
A.3	Case B "Aperture without niche and two acoustic breaks with Ratio 2:1" .....	13
A.4	Case C "Aperture with niche and one acoustic break" .....	13
Annex B (normative) Reference test partition Type 1 .....		14
B.1	Description of Reference test partition Type 1 .....	14
B.1.1	Single Framework, single board layer partition .....	14
B.2	Installation procedure of partition Type 1 .....	15
B.2.1	Installation of framework with channels and studs .....	15
B.2.2	Installation of plasterboards 1st side .....	16
B.2.3	Installation of insulation in cavity .....	16
B.2.4	Installation of plasterboards 2nd side .....	16
B.2.5	Jointing for both sides of the partition .....	16
Annex C (normative) Reference test partition Type 2 .....		18
C.1	Twin framework, double board layer partition .....	18
C.1.1	General .....	18
C.1.2	Installation of framework with channels and studs .....	19
C.2	Installation of plasterboards .....	20
C.2.1	General .....	20
C.2.2	Plasterboard inner layer on first side .....	20
C.2.3	Plasterboard outer layer on first side .....	20
C.3	Installation of insulation in cavity .....	21
C.4	Installation of plasterboards 2nd side - Plasterboard inner layer on second side .....	21

<b>C.5</b>	<b>Plasterboard outer layer on second side .....</b>	<b>21</b>
<b>C.6</b>	<b>Jointing for both sides of the partition .....</b>	<b>21</b>
<b>Annex D (informative)</b>	<b>Interlaboratory Tests performed for the development of this Test Code standard .....</b>	<b>22</b>
<b>Annex E (informative)</b>	<b>E Modulus - Control Method (static E Modulus with 3 bending points) .....</b>	<b>24</b>
<b>Annex F (informative)</b>	<b>E Modulus - Expertise Method (dynamic E Modulus) .....</b>	<b>25</b>
<b>Bibliography</b>	<b>.....</b>	<b>27</b>
