DIN ISO 16063-43:2016-11 (E)

Methods for the calibration of vibration and shock transducers - Part 43: Calibrat ion of accelerometers by model-based parameter identification (ISO 16063-43:2015)

Contents

Page

National foreword ... **3**

National Annex NA (informative) **Bibliography** ... **5**

Introduction ... **6**

1 Scope ... **8**

2 Normative references ... **8**

3 Terms and definitions ... **9**

4 List of symbols ... **9**

5 Consideration of typical frequency response and transient excitation ... **11**

6 General approach ... **13**

7 Linear mass-spring-damper model ... **13**
7.1 Model ... 13
7.2 Identification by sinusoidal calibration data ... 14
7.2.1 Parameter identification ... 14
7.2.2 Uncertainties of model parameters by analytic propagation ... 18
7.3 Identification by shock calibration data in the frequency domain ... 18
7.3.1 Identification of the model parameters ... 18
7.3.2 Uncertainties of model parameters by analytical propagation ... 23

8 Practical considerations ... **23**
8.1 The influence of the measurement chain ... 23
8.2 Synchronicity of the measurement channels ... 24
8.3 Properties of the source data used for the identification ... 24
8.4 Empirical test of model and parameter validity ... 24
8.4.1 Sinusoidal calibration data ... 24
8.4.2 Shock calibration data ... 24
8.5 Statistical test of model validity ... 25
8.5.1 General ... 25
8.5.2 Statistical test for sinusoidal data ... 25
8.5.3 Statistical test for shock data and the frequency domain evaluation ... 25

9 Reporting of results ... **26**
9.1 Common considerations on the reporting ... 26
9.2 Results and conditions to be reported ... 26

Bibliography ... **27**
