European foreword 4

European foreword to Amendment 1 5

Foreword to Amendment 1 6

Introduction 7

1 Scope 8
1.1 General 8
1.2 Types of noise and noise sources 8
1.3 Test room 8
1.4 Measurement uncertainty 8

2 Normative references 8

3 Terms and definitions 9

4 Reference meteorological conditions 14

5 Test rooms 15
5.1 Acoustic criterion for adequacy of the test room 15
5.2 Criteria for background noise 15
5.3 Criterion for air temperature 16

6 Instrumentation 16
6.1 Instruments for acoustical measurements 16
6.2 Instruments for meteorological measurements 18

7 Definition, location, installation and operation of noise source under test 18
7.1 General 18
7.2 Auxiliary equipment 18
7.3 Noise source location 18
7.4 Mounting of the noise source 19
7.5 Operation of source during test 19

8 Measurement surface 20
8.1 Spherical measurement surface for use in an anechoic room 20
8.2 Hemispherical measurement surface for use in a hemi-anechoic room 20

9 Determination of sound power levels and sound energy levels 21
9.1 Measurements in the test room 21
9.2 Measurement of meteorological conditions 21
9.3 Microphone positions 21
9.4 Determination of sound power levels of a noise source which emits steady or nonsteady noise 23
9.5 Determination of sound energy levels for a noise source which emits impulsive noise 27
9.6 Calculation of directivity indices 29
9.7 Calculation of surface sound pressure level non-uniformity index 30

9.8 Frequency-weighted sound power level and sound energy level 30

10 Measurement uncertainty 30
10.1 Methodology 30
10.2 Determination of omc 31
10.3 Determination of R0 31
10.4 Typical upper bound values of R0 32
10.5 Total standard deviation, tot, and expanded measurement uncertainty, U 33

11 Information to be recorded 34
11.1 General 34
11.2 Noise source under test 34
11.3 Test room 34
11.4 Instrumentation 34
11.5 Acoustical data 34

12 Test report 35

Annex A (normative) General procedures for qualification of anechoic and hemi-anechoic rooms .. 36

Annex B (normative) Qualification procedure for spaces within test rooms used in the determination of sound power levels and sound energy levels of specific noise sources 41

Annex C (normative) Calculation of A-weighted sound power levels and A-weighted sound energy levels from one-third-octave band levels 43

Annex D (normative) Array of microphone positions on a spherical measurement surface in a free field 45

Annex E (normative) Arrays of microphone positions on a hemispherical measurement surface in a hemi-free field 48

Annex F (normative) Coaxial circular paths of microphones on a hemispherical measurement surface in a hemi-free field 53

Annex G (normative) Meridional paths of microphones on a hemispherical measurement surface in a hemi-free field 54

Annex H (normative) Spiral paths of microphones on a hemispherical measurement surface in a hemifree field 56

Annex I (informative) Guidance on the development of information on measurement uncertainty 57

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC 67
