

DIN SPEC 45674:2018-03 (E)

Human exposure to mechanical vibration - Knowledge for performing and evaluation of measurements

Contents		Page
Foreword		3
Introduction		4
1 Scope		4
2 Normative references		4
3 Terms and definitions		5
4 Classification of competence		5
5 Levels of competence		6
5.1 General		6
5.2 Level I		6
5.3 Level II		6
5.4 Level III		7
Annex A (informative) Subjects of the relevant levels		8
Annex B (informative) Weighting of subjects		20
Annex C (informative) Selection of relevant standards		22
Bibliography		26
Images Figure 1 -- Classification of competence		5
Tables Table A.1 -- Subjects -- Locations of action with resultant hand-arm and whole-body vibrations		8
Table A.2 -- Additional subjects for locations of action with resultant hand-arm vibrations-		10
Table A.3 -- Additional subjects for locations of action with resultant whole-body vibrations		13
Table A.4 -- More extensive subjects for locations of action on water vehicles		16
Table A.5 -- More extensive subjects for locations of action in buildings (including stationary machines and systems)		18
Table B.1 -- Overview of the subject weighting		20
Table C.1 -- Relevant standards according to levels for all subjects		22
Table C.2 -- Relevant standards for the subject of hand-arm vibrations		23
Table C.3 -- Relevant standards for the subject of whole-body vibrations		24
Table C.4 -- Relevant standards for the subject of whole-body vibrations on water vehicles		24
Table C.5 -- Relevant standards for the subject of whole-body vibrations in buildings		25
