| Foreword .....  |  | v           |
| 1               | Scope .....  | 1           |
| 2               | Normative references .....   | 1           |
| 3               | Terms and definitions .....  | 1           |
| 4               | Symbols .....  | 2           |
| 5               | Vibration values .....   | 3           |
| 6               | Auxiliary table configurations .....                                     | 3           |
| 6.1             | General .....  | 3           |
| 6.2             | Typical designs of the head expander .....                               | 4           |
| 6.2.1           | General .....  | 4           |
| 6.2.2           | Expander with linear bearing guidance and air spring support .....       | 5           |
| 6.2.3           | Expander with hydrostatic bearing guidance and air spring supports ..... | 5           |
| 6.2.4           | Bare head expander .....   | 5           |
| 6.3             | Typical designs of the slip table .....                                  | 5           |
| 6.3.1           | General .....  | 5           |
| 6.3.2           | Hydrostatic bearing table .....  | 5           |
| 6.3.3           | Flat spring table .....  | 6           |
| 6.3.4           | Oil or air cushion table .....   | 6           |
| 6.3.5           | Mechanical slide table .....   | 6           |
| 6.3.6           | Ball, roller or needle bearing table .....                               | 6           |
| 6.3.7           | Hydraulic slide table .....  | 6           |
| 6.3.8           | Magnetic bearing table .....   | 6           |
| 6.3.9           | Dry bearing table with hydrostatic compensation .....                    | 6           |
| 6.4             | Axis systems .....   | 7           |
| 6.4.1           | Moving table reference axis system .....                                 | 7           |
| 6.4.2           | Other moving table reference axis systems .....                          | 8           |
| 7               | Auxiliary table characteristics .....                                    | 8           |
| 7.1             | General .....  | 8           |
| 7.2             | Characteristics .....  | 8           |
| 7.2.1           | Effective travel .....   | 8           |
| 7.2.2           | Rated frequency range .....  | 8           |
| 7.2.3           | Rated RMS velocity $v_z$ .....   | 8           |
| 7.2.4           | Static load (limit) $F_s$ .....  | 8           |
| 7.2.5           | Static load (limit) per unit area $F_p$ .....                            | 8           |
| 7.2.6           | Limiting axial forces .....  | 8           |
| 7.2.7           | Limiting pitching torque $C$ .....                                       | 8           |
| 7.2.8           | Limiting rolling torque $C$ .....  | 9           |
| 7.2.9           | Limiting yawing torque $C$ .....   | 9           |
| 7.2.10          | Transmissibility .....   | 9           |
| 7.2.11          | Total harmonic distortion of acceleration .....                          | 9           |
| 7.2.12          | Environmental limits .....   | 9           |
| 7.2.13          | Load mounting insert pattern .....                                       | 9           |
| 8               | Test loads .....   | 10          |
