ISO 11691:2020 (E)

Acoustics — Measurement of insertion loss of ducted silencers without flow — Laboratory survey method

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Test facility and arrangement

- 4.1 General
- 4.2 Sound measuring equipment
- 4.3 Sound source equipment
- 4.3.1 General
- 4.3.2 Electronic equipment, loudspeaker unit and transition element
- 4.3.3 Modal filter
- 4.4 Transition element
- 4.5 Test ducts and substitution duct
- 4.6 Reverberation room
- 4.7 Other measurement environments

5 Test procedure

6 Measurement uncertainty

7 Information to be recorded

- 7.1 General
- 7.2 Description of the silencer under test
- 7.3 Description of the test arrangement
- 7.4 Acoustical test result

8 Information to be reported
