

DIN EN ISO 11690-2:2021-04 (E)

Acoustics - Recommended practice for the design of low-noise workplaces containing machinery - Part 2: Noise control measures (ISO 11690-2:2020)

Contents		Page
European foreword		3
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Technical aspects of noise control	6
5	Noise control at source	8
5.1	General	8
5.2	Noise control at source by design	8
5.3	Information on noise emission	9
5.4	Use of low-noise machines	9
5.5	Modification or replacement of machine components	12
5.6	Low noise working and production technologies	13
5.7	Maintenance of machines and noise control devices	13
6	Noise control on the transmission path	13
6.1	Noise control by means of a proper spatial arrangement of the noise sources	13
6.2	Use of noise control devices	13
6.3	Noise control by use of sound-absorbing materials	13
6.4	Sound propagation in structures and noise control measures	16
7	Noise control at the work station	16
8	Verification methods	17
8.1	General	17
8.2	Sound sources	17
8.3	Noise control devices	17
8.4	Workroom	17
8.5	Specified positions, work stations	17
9	New technologies	18
Annex A (informative)	Modification or replacement of machine components	19
Annex B (informative)	Arrangement of sound sources	21
Annex C (informative)	Enclosures	22
Annex D (informative)	Silencers	25
Annex E (informative)	Noise barriers and screens in rooms	26
Annex F (informative)	Acoustical treatment of surfaces	27

Annex G (informative) Structure-borne sound insulation	29
Annex H (informative) Airborne sound insulation of partitions	30
Annex I (informative) Noise control at the work station	31
Annex J (informative) Example of a new technology	32
Bibliography	34
