## Mechanical vibration - Uncertainty of the measurement and evaluation of human exposure to vibration

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Considerations regarding the uncertainty of vibration measurements .....	7
4.1	Measurement objectives and fixed parameters .....	7
4.2	Types of uncertainties .....	8
4.3	Measurement instrumentation uncertainty sources .....	8
5	Evaluation of the uncertainty .....	9
5.1	Evaluation of the uncertainty through mathematical modelling .....	9
5.2	Determination of the uncertainty from interlaboratory tests .....	10
5.3	Determination (estimation) of uncertainties from field measurements .....	10
6	Presentation of results .....	11
7	Use of uncertainties .....	13
7.1	General .....	13
7.2	Use of uncertainties in comparisons .....	13
Annex A (informative) Uncertainty in the measurement of hand-arm vibration at the workplace -- Example for determination of the measurement uncertainty of the vibration exposure during task-based measurements according to ISO 5349-2 .....		14
Annex B (informative) Example for determination of the measurement uncertainty of emission measurements on hand-held and hand-guided machines .....		25
Annex C (informative) Typical errors .....		28
Annex D (informative) Statistical background .....		30
Bibliography .....		31
