## Mechanical vibration - Uncertainty of the measurement and evaluation of human exposure to vibration

---

| <b>Contents</b>  |   | <b>Page</b> |
|--|---|-------------|
| Foreword .....   |   | iv          |
| Introduction .....   |   | v           |
| 1  | Scope .....   | 1           |
| 2  | Normative references .....  | 1           |
| 3  | Terms and definitions .....   | 1           |
| 4  | Considerations regarding the uncertainty of vibration measurements .....  | 7           |
| 4.1  | Measurement objectives and fixed parameters .....                         | 7           |
| 4.2  | Types of uncertainties .....  | 8           |
| 4.3  | Measurement instrumentation uncertainty sources .....                     | 8           |
| 5  | Evaluation of the uncertainty .....                                       | 9           |
| 5.1  | Evaluation of the uncertainty through mathematical modelling .....        | 9           |
| 5.2  | Determination of the uncertainty from interlaboratory tests .....         | 10          |
| 5.3  | Determination (estimation) of uncertainties from field measurements ..... | 10          |
| 6  | Presentation of results .....   | 11          |
| 7  | Use of uncertainties .....  | 13          |
| 7.1  | General .....   | 13          |
| 7.2  | Use of uncertainties in comparisons .....                                 | 13          |
| Annex A (informative) Uncertainty in the measurement of hand-arm vibration at the workplace --<br>Example for determination of the measurement uncertainty of the vibration exposure<br>during task-based measurements according to ISO 5349-2 ..... |   | 14          |
| Annex B (informative) Example for determination of the measurement uncertainty of emission<br>measurements on hand-held and hand-guided machines .....   |   | 25          |
| Annex C (informative) Typical errors .....   |   | 28          |
| Annex D (informative) Statistical background .....   |   | 30          |
| Bibliography .....   |   | 31          |
