

# DIN EN ISO 11819-1:2024-10 (E)

## Acoustics - Measurement of the influence of road surfaces on traffic noise - Part 1: Statistical Pass-By method (ISO 11819-1:2023)

---

<b>Contents</b>	<b>Page</b>
<b>European foreword</b> .....	<b>4</b>
<b>Foreword</b> .....	<b>5</b>
<b>Introduction</b> .....	<b>7</b>
<b>1 Scope</b> .....	<b>8</b>
<b>2 Normative references</b> .....	<b>8</b>
<b>3 Terms and definitions</b> .....	<b>9</b>
3.1 Types of noise.....	9
3.2 Measurement method.....	9
3.3 Road speed categories.....	9
3.4 Vehicle categories.....	10
3.5 Measured noise quantities.....	10
3.6 Road surface terms applicable in this method.....	11
3.7 Backing board terms.....	11
<b>4 Symbols and abbreviated terms</b> .....	<b>11</b>
<b>5 Measuring principle</b> .....	<b>12</b>
<b>6 Instrumentation</b> .....	<b>12</b>
6.1 Instruments for acoustical measurements.....	12
6.1.1 General.....	12
6.1.2 Verification.....	12
6.2 Instruments for vehicle speed measurements.....	13
6.2.1 General.....	13
6.2.2 Verification.....	13
6.3 Instruments for temperature measurements.....	13
6.3.1 General.....	13
6.3.2 Verification.....	13
<b>7 Test sites</b> .....	<b>14</b>
7.1 Selection of measuring site.....	14
7.2 Deviations from free-field conditions.....	14
7.3 Considerations of guard rails and other barriers which can reflect or screen the sound.....	14
7.4 Surface between the tested road surface and microphone.....	15
7.5 Backing board.....	17
<b>8 Traffic conditions</b> .....	<b>17</b>
8.1 Vehicle classification.....	17
8.2 Selection of vehicles for measurement.....	17
8.3 Minimum number of vehicles.....	18
8.4 Road speed categories.....	19
<b>9 Measuring procedure</b> .....	<b>19</b>
9.1 Microphone position.....	19
9.2 Calibrations.....	20
9.3 Sound level measurement.....	21
9.4 Frequency spectrum measurement.....	21
9.5 Speed measurement.....	21
9.6 Temperature measurement.....	21

<b>10</b>	<b>Meteorological conditions</b> .....	<b>21</b>
10.1	Wind.....	21
10.2	Temperature.....	21
10.3	Recommendations on road surface moisture.....	21
<b>11</b>	<b>Background noise</b> .....	<b>22</b>
<b>12</b>	<b>Normalization of data</b> .....	<b>22</b>
12.1	Compensating for the effect of the additional (higher) microphone position.....	22
12.2	Combining vehicle categories H2 and H3+ into a common heavy vehicle category H.....	22
12.3	Noise versus speed - regression analysis (for passenger cars).....	23
12.4	Noise versus speed – normalization to reference speed (for heavy vehicles).....	23
12.5	Noise versus speed – normalization of frequency spectra for vehicles in categories P and H.....	25
12.6	Determination of SPB sound level at reference speeds.....	25
12.7	Useful speed range for the speed normalization.....	25
12.8	Correction of sound levels according to temperature.....	25
<b>13</b>	<b>Measurement uncertainty</b> .....	<b>26</b>
<b>14</b>	<b>Reported data</b> .....	<b>27</b>
14.1	General information.....	27
14.2	Information relating to the location and appearance of the test site.....	28
14.3	Information relating to the type and construction of the tested road surface.....	28
14.4	Information relating to the condition of the tested surface and environmental factors.....	28
14.5	Road speed category and vehicle information.....	28
14.6	Measured and calculated sound level and speed data.....	28
14.7	Others.....	29
	<b>Annex A (normative) Vehicle categories</b> .....	<b>30</b>
	<b>Annex B (informative) Determination of the statistical pass-by index (SPBI)</b> .....	<b>34</b>
	<b>Annex C (informative) The backing board variant</b> .....	<b>36</b>
	<b>Annex D (informative) Adding 95 % confidence intervals</b> .....	<b>41</b>
	<b>Annex E (informative) Validity and stability of the method</b> .....	<b>42</b>
	<b>Annex F (informative) Reference road surface</b> .....	<b>43</b>
	<b>Annex G (informative) Monitoring the stability of sound levels of vehicle fleets</b> .....	<b>45</b>
	<b>Annex H (informative) Uncertainty</b> .....	<b>47</b>
	<b>Annex I (informative) Example of test report</b> .....	<b>50</b>
	<b>Bibliography</b> .....	<b>53</b>
