

ISO 10326-3:2024-11 (E)

Mechanical vibration - Laboratory method for evaluating vehicle seat vibration - Part 3: Specification of dynamic dummies for Z-axis motion

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Symbols and abbreviated terms		3
5 Measuring instrumentation and vibration equipment		3
6 Requirements for dynamic dummies		4
6.1 Mass		4
6.2 Mechanical components		4
6.3 Seat contact		4
6.4 Apparent mass		4
7 Validation test for dynamic dummies		6
8 Test report		8
Annex A (informative) Idealized Z-axis (vertical) apparent mass at seat cushion of a lightweight (52 kg to 55 kg) group and of a heavyweight (98 kg to 115 kg) group		9
Annex B (informative) An example of passive dynamic dummy		14
Annex C (informative) Example of active dynamic dummy		18
Annex D (informative) Comparison of SEAT value of seats measured with an active dynamic dummy and with participants		19
Annex E (informative) Example of setting up a dynamic dummy on a seat for measuring seat transmissibility		21
Bibliography		22
