ISO 17208-3:2025-09 (E)

Underwater acoustics - Quantities and procedures for description and measurement of underwater sound from ships - Part 3: Requirements for measurements in shallow water

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 General measurement requirements 5
4.1 General 5
4.2 Test ship parameters 5
4.3 Frequency range 6
4.4 CPA distance 6
4.5 Test site selection 6
4.6 Sea surface conditions 7
4.7 Acoustic measuring instrumentation 7
4.7.1 System sensitivity 7
4.7.2 Frequency range and sampling rate 8
4.7.3 Directivity 8
4.7.4 System self-noise 8
4.7.5 Dynamic range 9
4.7.6 Full system calibration 9
4.7.7 Field calibration checks 9
4.7.8 Data quality 9
4.8 Distance measurement 10
4.9 Hydrophone deployment 10
4.9.1 General 10
4.9.2 Vessel based deployments 11
4.9.3 Static deployments (bottom-tethered systems) 11
4.9.4 General criteria for deployments 11
4.9.5 Minimization of self-noise 11

5 Measurementconfiguration 12
5.1 Number of hydrophones 12
5.2 Hydrophone deployment configuration 12
5.3 Test course and ship operation 12
5.4 Number of runs 15
5.5 Background noise measurement 15

6 Dataprocessing 16
6.1 General 16
6.2 Calculation of sound pressure levels 16
6.3 Background noise adjustments 16
6.4 Sensitivity adjustments 17

7 Source level calculation 18
7.1 Calculation of source level 18

7.2 Hydrophone and run combination post-processing 20
7.2.1 Introduction 20
7.2.2 Multiple hydrophones 20
7.2.3 Multiple runs 21
7.3 Calculation of radiated noise level 21

8 Measurement uncertainty 21
8.1 Overview 21
8.2 Uncertainty in measurement of source level 22
8.2.1 Combined uncertainty 22
8.2.2 Uncertainty in measurement of sound pressure levels 22
8.2.3 Uncertainty in the source level computation 22

8.2.4 Variability of the source 23

9 Reportingofresults 23
9.1 Records required from vessel under test 23
9.2 Records required from fixed range or deploying vessel 24
9.3 Reporting results 25

Annex A (informative) Examples of deployment methods 27

Annex B (informative)Mitigationofplatformanddeploymentrelatednoise 31

Annex C (informative) Calculation of sound pressure level in decidecade bands 33

Annex D (informative)Propagationlosscalculation(SSCI) 39

Annex E (informative) Non-standard additional source level calculation methods 44

Annex F (informative) Evaluation of uncertainties 49

Annex G (informative) Notes on records and example additional records that may be required by the trial authority 56

Bibliography 58
