DIN ISO 13473-4:2026-11 (E)

Characterization of pavement texture by use of surface profiles - Part 4: One third octave band spectral analysis of surface profiles (ISO 13473-4:2024)

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **2**

4 Symbols and abbreviated terms ... **4**

5 Basic outline of methodologies of spatial frequency analysis ... **5**

6 Sampling of surface profiles ... **7**
6.1 Requirements concerning profilometers and data preparations ... 7
6.2 Sampling of road sections ... 7
6.3 Measurement of laboratory samples ... 7
6.4 Texture profile levels (logarithmic scale) ... 8
6.5 Anti-aliasing filtering ... 8
6.6 Drop-out correction and interpolation ... 8
6.7 Resampling to a constant spatial resolution ... 10
6.8 Spike identification and reshaping the profile ... 10

7 Spectral analysis in constant-percentage bandwidth bands (octave- or one-third-octave bands) by digital filtering ... **10**

8 Uncertainty of analysis results ... **11**

9 Reporting of analysis results ... **12**

Annex A (normative) **Uncertainty of spectral analysis results** ... **13**

Annex B (informative) **Spectral analysis and profile asymmetry** ... **18**

Annex C (informative) **Spectral analysis by means of discrete (fast) Fourier transform methods** ... **19**

Annex D (normative) **Spike removal procedure** ... **27**

Annex E (informative) **Testing the calculation procedure** ... **30**

Annex F (normative) **Profile conditioning before filtering** ... **32**

Bibliography ... **35**
