

# DIN ISO 226:2006-04 (E)

## Acoustics - Normal equal-loudness-level contours (ISO 226:2003)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		2
Introduction .....		3
1 <b>Scope</b> .....		4
2 <b>Normative references</b> .....		4
3 <b>Terms and definitions</b> .....		4
4 <b>Formula for derivation of normal equal-loudness-level contours</b> .....		5
4.1 <b>Deriving sound pressure level from loudness level</b> .....		5
4.2 <b>Deriving loudness levels from sound pressure levels</b> .....		6
<b>Annex A (normative) Normal equal-loudness-level contours for pure tones under free-field listening conditions</b> .....		8
<b>Annex B (normative) Tables for normal equal-loudness-level contours for pure tones under free-field listening conditions</b> .....		9
<b>Annex C (informative) Notes on the derivation of the normal equal-loudness-level contours</b> .....		12
<b>Bibliography</b> .....		20
