Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols 4

5 Preliminary tests 4
5.1 General requirements 4
5.2 Lateral stability test 5
5.3 Non-continuous rolling test 5

6 Tractor and test preparation 6
6.1 Test methods 6
6.2 General rules governing preparation for tests 6

7 Test apparatus and equipment 7
7.1 Apparatus for both dynamic and static testing 7
7.2 Apparatus for dynamic testing 9
7.3 Apparatus for static testing 14

8 Test procedures 14
8.1 General requirements 14
8.2 Test sequence 15
8.3 Rear fixture test procedure 15
8.4 Dynamic (impact) test procedures for front-mounted ROPS 15
8.5 Static test procedures for front-mounted ROPS 18
8.6 Vertical crushing test procedure 19
8.7 Additional crushing tests 20
8.8 Observations during testing 20

9 Seat index point 20

10 Clearance zone 20
10.1 General 20
10.2 Clearance zone for tractors with a non-reversible seat 21
10.3 Clearance zone for tractors with a reversible driving position 22
11 Tolerances 23
12 Acceptance conditions 23
12.1 General requirements 23
12.2 After impact loads 24
12.3 After static horizontal loads 24
12.4 Cold weather embrittlement 25
13 Extension to other models 27
14 Labelling 28
15 Test report 28

Annex A (normative) Requirements for providing resistance to brittle fracture of front-mounted ROPS at a reduced operation temperature 29

Annex B (normative) Test report for front-mounted ROPS 31

Annex C (normative) Non-continuous rolling test procedure -- Calculation method 40
