Foreword to ISO 15783:2002 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Design 12
4.1 General 12
4.2 Prime movers 12
4.3 Critical speed, balancing and vibrations 14
4.4 Pressure-containing parts 15
4.5 Branches, nozzles and miscellaneous connections 18
4.6 External forces and moments on flanges (inlet and outlet) 19
4.7 Branch (nozzle) flanges 19
4.8 Impellers 19
4.9 Wear rings or equivalent components 19
4.10 Running clearance 19
4.11 Shafts 20
4.12 Bearings 20
4.13 Circulation flow 21
4.14 Nameplates 22
4.15 Direction of rotation 22
4.16 Couplings for magnetic drive pumps 22
4.17 Baseplate 23
4.18 Monitoring 23

5 Materials 24
5.1 Selection of materials 24
5.2 Material composition and quality 24
5.3 Repairs 24

6 Testing 24
6.1 General 24
6.2 Material tests 25
6.3 Pump test and inspection 25

7 Preparation for despatch 28
7.1 Surface protection 28
7.2 Securing of rotating parts for transport 28
7.3 Openings 28
7.4 Pipes and auxiliaries 28
7.5 Identification 28

8 Information for use 29

Annex A (normative) Data sheet for magnetic drive pumps and canned motor pumps 30

Annex B (informative) External forces and moments on flanges 35

Annex C (informative) Enquiry, proposal and purchase order 36

Annex D (informative) Documentation after purchase order 37

Annex E (informative) Typical circulation piping plans and characteristics for canned motor pumps and magnetic drive pumps 38

Annex F (informative) Internationally accepted materials for pump parts 44

Annex G (informative) Checklist 51

Annex ZA (normative) Normative references to international publications with their relevant European publications 53

Bibliography 54
