ISO/TR 10771-2:2008-12 (E)

Hydraulic fluid power - Fatigue pressure testing of metal pressure-containing envelopes - Part 2: Rating methods

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Selection of material factors 2

5 Determination of cyclic test pressure 2

6 Conduct of fatigue test 3

7 Rating by similarity 4

8 Rating declaration 4

9 Identification statement (reference to this part of ISO 10771) 4

Annex A (informative) Material factor database 5

A.1 Values of coefficient of variation, ko, for commonly used metals 5
A.2 Procedures used to establish values of coefficient of variation, ko, for the metals listed in Table A.1 5

Annex B (normative) Calculation of variability factor KV 13

B.1 General 13
B.2 Method 13

Annex C (informative) Proposal for an acceleration factor 15

C.1 General 15
C.2 Extrapolating data to 107 cycles 15
C.3 Examples 19

Annex D (informative) Basis of fatigue pressure rating [9] 21

D.1 Basis of pressure rating 21
D.2 Statistical analysis theory 22
D.3 Fatigue distribution data 28
D.4 Data calculation example 33
D.5 Raw data points for sample problem 39
