ISO 16100-5:2009-03 (E)

Industrial automation systems and integration - Manufacturing software capability profiling for interoperability - Part 5: Methodology for profile matching using multiple capability class structures

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Abbreviated terms 2

5 Multiple CCSs referenced in manufacturing applications and in MSUs 3
5.1 Profile matching concept 3
5.2 Reuse of MSUs 4
5.3 Registration of MSUs 4
5.4 Applying reusable MSUs to meet requirements of a new manufacturing application 4
5.5 Manufacturing Domain Data 6
5.6 Mapping capability classes to MDDs 8

6 Methods and rules for capability profiling 9
6.1 Templates for MSU capability profiling 9
6.2 CCS template 9
6.3 Capability profile template 11
6.4 MDM Template 17
6.5 MDD templates 19

7 Profile matching based on multiple capability class structures 21
7.1 Capability profile matching procedure 21
7.2 Matching report 25

8 Conformance 26

Annex A (informative) Process for Generating a MDM and MDDs 35

Annex B (informative) Example of profile matching using multiple capability classes 36
