

# DIN 3970:2010-04 (E)

## Master gears for checking cylindrical gears - Gear blanks and gearing

---

<b>Contents</b>		<b>Page</b>
1	Scope .....	5
2	Normative references .....	5
3	Master gear applications .....	5
4	Symbols, subscripts and units .....	6
5	Dimensions .....	7
5.1	Gear body .....	7
5.2	Centre hole diameter, $D_1$ .....	8
5.3	Axial runout of the gear face and radial runout of the clocking bend .....	9
6	Geometry .....	10
6.1	Design .....	10
6.2	Number of teeth, $z$ .....	10
6.3	Tooth thickness, $s_n$ .....	11
6.4	Tooth system edge finish .....	11
6.5	Tip diameter, $d_a$ .....	13
6.6	Active tip diameter, $d_{Na}$ .....	13
6.7	Root form diameter, $d_{Ff}$ .....	13
6.8	Root diameter, $d_f$ .....	13
6.9	Modifications .....	13
7	Tolerances .....	14
7.1	Tolerances of deviations .....	14
7.2	Special pressure angles .....	16
8	Material .....	16
9	Technical drawings of master gears .....	17
10	Marking and designation .....	17
11	Ordering information .....	19
12	Quality inspection .....	20
12.1	Test certificate .....	20
12.2	Measurement equipment requirements .....	20
12.3	Evaluation of tooth system measurements .....	20
13	Wear inspection and re-working .....	21
14	Packaging, storage and handling .....	21
15	Master gears not conforming to all individual specifications of this standard .....	21
15.1	Special designs .....	21
15.2	Centre hole diameter, $D_1$ .....	21
Annex A (informative) Some examples of standard numbers of teeth .....		22
Bibliography .....		23

<b>Figures</b>	<b>Figure 1 -- Master gear, sizes 1 to 5 .....</b>	<b>8</b>
	<b>Figure 2 -- Master gear, sizes 6 to 8 .....</b>	<b>8</b>
	<b>Figure 3 -- Designation of tooth edges .....</b>	<b>12</b>
	<b>Figure 4 -- Tooth profile with a tip edge chamfer, cross-section of tooth system .....</b>	<b>12</b>
	<b>Figure 5 -- Location of marking on master gears .....</b>	<b>17</b>
	<b>Figure 6 -- Marking on tooth number 1 of master gears of sizes 1 to 4 .....</b>	<b>17</b>
	<b>Figure 7 -- Marking and designation of master gears .....</b>	<b>19</b>
<b>Tables</b>	<b>Table 1 -- Master gear body dimensions .....</b>	<b>7</b>
	<b>Table 2 -- Permissible dimensional deviations and form deviations for the centre hole .....</b>	<b>9</b>
	<b>Table 3 -- Permissible relative positional deviations of master gears from the axis A of the centre hole .....</b>	<b>9</b>
	<b>Table 4 -- Recommended tooth thickness tolerances .....</b>	<b>11</b>
	<b>Table 5 -- Quality parameters for master gear accuracy classes A, B and C .....</b>	<b>14</b>
	<b>Table 6 -- Tolerances of deviations F, fp, Fp, Fr for accuracy class A .....</b>	<b>15</b>
	<b>Table 7 -- Tolerances of deviations F, fp, Fp, Fr for accuracy class B .....</b>	<b>15</b>
	<b>Table 8 -- Tolerances of deviations F, fp, Fp, Fr for accuracy class C .....</b>	<b>15</b>
	<b>Table 9 -- Tolerances of total helix deviation F for accuracy classes A, B and C .....</b>	<b>16</b>
