ISO/TS 21220:2009-10 (E)

Particulate air filters for general ventilation - Determination of filtration performance

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms, definitions, symbols and abbreviated terms 2

4 Filter 6

5 Classification/rating 6

6 Test rig and equipment 6
6.1 Test conditions 6
6.2 Test rig 6
6.3 DEHS test aerosol generation 7
6.4 KCl test aerosol generation 10
6.5 Aerosol sampling system 12
6.6 Flow measurement 13
6.7 Particle counter 13
6.8 Differential pressure-measuring equipment 13
6.9 Dust feeder 13

7 Qualification of test rig and apparatus 17
7.1 General 17
7.2 Air velocity uniformity in the test duct 17
7.3 Aerosol uniformity in the test duct 18
7.4 Particle counter sizing accuracy 18
7.5 Particle counter zero test 19
7.6 Particle counter overload test 19
7.7 100 % efficiency test 19
7.8 Zero % efficiency test 19
7.9 Aerosol generator response time 20
7.10 Correlation ratio 20
7.11 Pressure drop checking 20
7.12 Dust feeder air flow rate 21
7.13 Reference filter check 22
7.14 Activity of the aerosol neutralizer 23
7.15 Summary of qualification requirements 23
7.16 Apparatus maintenance 24

8 Test materials 24
8.1 Test air 24
8.2 Test aerosol 24
8.3 Loading dust 25
8.4 Final filter 26

9 Test procedure 26
9.1 General 26
9.2 Preparation of filter to be tested 27

9.3 Initial pressure drop 27
9.4 Initial efficiency measurement 27
9.5 Conditioning test 29
9.6 Dust loading 29

10 Uncertainty calculation of the test results 31
11 Test report 32
11.1 General 32
11.2 Interpretation of test reports 32
11.3 Summary 33
11.4 Efficiency 35
11.5 Pressure drop and air flow rate 35
11.6 Marking 35

Annex A (normative) Conditioning test 42

Annex B (informative) Shedding from filters 45

Annex C (informative) Commentary 47

Annex D (normative) Pressure drop calculation 51

Bibliography 53
