## Gas turbines - Acceptance tests

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	2
3	Terms and definitions .....	3
4	Test boundary .....	6
5	Symbols .....	8
6	Preparation for tests .....	12
6.1	General .....	12
6.2	Test procedure .....	13
6.3	Test preparation .....	14
6.4	Instruments and measuring methods .....	16
7	Conductance of test .....	29
7.1	Specified reference conditions .....	29
7.2	Preliminary checks .....	32
7.3	Starting and stopping of tests .....	32
7.4	Operation prior and during test .....	33
7.5	Duration of tests .....	35
7.6	Maximum permissible variations in operating conditions .....	35
7.7	Test records .....	36
7.8	Test validity .....	37
8	Computation of results .....	37
8.1	Performance test results .....	37
8.2	Correction of test results to reference conditions .....	40
8.3	Other gas turbine performance parameters .....	46
9	Test report .....	55
Annex A (informative) Uncertainty .....		56
Annex B (informative) Example calculation of exhaust mass flow rate and turbine inlet temperature energy balance calculation .....		68
Bibliography .....		106
