

# DIN EN 1539:2010-08 (E)

## Dryers and ovens, in which flammable substances are released - Safety requirements

<b>Contents</b>	<b>Page</b>
Foreword.....	4
Introduction.....	5
1 Scope .....	6
2 Normative references .....	6
3 Terms and Definitions .....	8
4 Significant hazards .....	12
5 Safety requirements and/or protective measures .....	17
5.1 General.....	17
5.2 Safety requirements against mechanical hazards .....	18
5.2.1 Shearing, crushing, drawing-in .....	18
5.2.2 Means of escape .....	18
5.2.3 Safety requirements against slip and fall hazards .....	19
5.3 Safety requirements against electrical hazards .....	19
5.3.1 General.....	19
5.3.2 Electrical equipment.....	19
5.3.3 External influences on the electrical equipment .....	19
5.4 Safety requirements against thermal hazards .....	19
5.5 Safety requirements against hazards from noise .....	20
5.6 Safety requirements against hazards from radiation.....	20
5.7 Safety requirements against hazards generated from hazardous substances .....	21
5.8 Fire protection and prevention.....	21
5.8.1 General.....	21
5.9 Explosion protection and prevention requirements .....	22
5.9.1 Type A-dryers.....	22
5.9.2 Type B-dryers.....	29
5.10 Control systems.....	31
5.11 Failure of energy supply .....	31
6 Verification of the safety requirements and/or measures .....	31
7 Information for use .....	34
7.1 General.....	34
7.2 Instruction handbook .....	34
7.2.1 General.....	34
7.2.2 Information related to installation.....	35
7.2.3 Information related to operation .....	35
7.2.4 Information related to maintenance and inspection .....	36
7.3 Marking .....	37
<b>Annex A (normative) Basis for air flow calculation of chamber dryers and continuous flow dryers .....</b>	<b>38</b>
<b>A.1 Chamber dryers .....</b>	<b>38</b>
<b>A.1.1 Calculation basis for chamber dryers .....</b>	<b>38</b>
<b>A.2 Continuous flow dryers.....</b>	<b>43</b>
<b>A.2.1 Calculation basis for continuous flow dryers.....</b>	<b>43</b>
<b>A.2.2 Calculation basis for continuous flow dryers for powder coatings .....</b>	<b>45</b>
<b>Annex B (informative) Examples of calculation .....</b>	<b>46</b>
<b>B.1 Chamber dryers .....</b>	<b>46</b>
<b>B.1.1 Example 1: Calculation of the required minimum exhaust flow (see 3.20).....</b>	<b>46</b>
<b>B.1.2 Example 2: Calculation of the maximum admissible amount of varnish.....</b>	<b>47</b>
<b>B.2 Continuous flow dryers.....</b>	<b>48</b>

B.2.1	Examples for the calculation of the minimum exhaust flow rate .....	48
B.2.2	Example for the calculation of the maximum admissible throughput of flammable substances .....	50
Annex C	(normative) Concentration measurement in dryers .....	52
C.1	General .....	52
C.2	Requirements for concentration measuring systems .....	52
C.3	Calculation of the lower explosion limit at drying temperature .....	53
C.3.1	Influence of temperature on the indicated value of concentration (physical influence) .....	53
C.3.2	Influence of the temperature of mixture on the kinetics of reaction (chemical influence) .....	54
C.3.3	Consideration of chemical and physical influences .....	54
Annex D	(normative) Explosion reliefs .....	55
Annex ZA	(informative) Relationship between this European Standard and the Essential Requirements of EU Directive Machinery 98/37/EC .....	56
Annex ZB	(informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC .....	57
Bibliography	.....	58

## Figures

Figure 1	— Maximum admissible concentration of flammable substances and admissible operating ranges for dryers with limited concentration .....	28
Figure A.1	— Dependency of $\gamma$ versus $\tau$ .....	42

## Tables

Table 1	— List of significant hazards .....	12
Table 2	— Requirements according to the operating ranges .....	27
Table 3	— Verification .....	32
