DIN EN 13001-2:2011-07 (E)

Crane safety - General design - Part 2: Load actions

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms, definitions, symbols and abbreviations 6
3.1 Terms and definitions 6
3.2 Symbols and abbreviations 6

4 Safety requirements and/or measures 11
4.1 General 11
4.2 Loads 11
4.2.1 General 11
4.2.2 Regular loads 12
4.2.3 Occasional loads 18
4.2.4 Exceptional loads 25
4.3 Load combinations 31
4.3.1 General 31
4.3.2 High risk applications 32
4.3.3 Mass distribution classes MDC1 and MDC2 32
4.3.4 Partial safety factors for the mass of the crane 33
4.3.5 Partial safety factors to be applied to loads caused by displacements 33
4.3.6 Survey of load combinations 34
4.3.7 Partial safety factors for the proof of rigid body stability 38

Annex A (normative) Aerodynamic coefficients 41

A.1 General 41
A.2 Individual members 44
A.3 Plane and spatial lattice structure members 49
A.4 Structural members in multiple arrangement 52

Annex B (informative) Illustration of the types of hoist drives 54

Annex C (informative) Selection of a suitable set of crane standards for a given application 58

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC 59

Bibliography 60

Tables Table 1 -- Symbols and abbreviations 7

Table 2 -- Values of 2 and 2,min 13

Table 3 -- Values of vh for estimation of 2 14

Table 4 -- In-service wind states 20

Table 5 -- Values of 1i, 2i, 1i and 2i 24

Table 6 -- Reference storm wind velocities vref in dependence on regions in Europe as shown in Figure 12 28

Table 7 -- Values of factor p 33

Table 8 -- Values of the partial safety factor p to be applied to loads due to intended displacements 33

Table 9 -- Values of the partial safety factor p to be applied to loads due to unintended displacements 34

Table 10 -- Loads, load combinations and partial safety factors 35

Table 11 -- Partial safety factors for the proof of rigid body stability 39

Table A.1 -- Relative aerodynamic length r 43

Table A.2 -- Aerodynamic coefficients co for individual members of circular sections 45

Table A.3 -- Aerodynamic coefficients coy, coz for individual flat sided structural members 46

Table A.4 -- Aerodynamic coefficients co for individual structural members of triangular and rectangular hollow sections 48

Table A.5 -- Characteristic areas A and aerodynamic coefficients co for plane and spatial lattice structure members 49

Table A.6 -- Characteristic areas A and aerodynamic coefficients co of structural members in multiple arrangement 52

Table B.1 -- Hoist drive types 54
