|--------------------|---|-------------|
| Foreword .....     |   | v           |
| Introduction ..... |   | vi          |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....                            | 1           |
| 3                  | Terms and definitions .....                           | 1           |
| 4                  | Symbols .....   | 5           |
| 5                  | Basic principles .....                                | 7           |
| 5.1                | General .....   | 7           |
| 5.2                | Energy flow diagram .....                             | 9           |
| 5.3                | Process Heating Assessment Survey Tool .....          | 9           |
| 6                  | Basic conditions of measurement and calculation ..... | 9           |
| 6.1                | State of furnace .....                                | 9           |
| 6.2                | Duration of measurement .....                         | 9           |
| 6.3                | Unit of specific energy intensity .....               | 9           |
| 6.4                | Reference conditions .....                            | 9           |
| 6.5                | Unit of amount of gas .....                           | 9           |
| 6.6                | Fuel .....  | 9           |
| 7.1                | General .....   | 9           |
| 7.2                | Energy balance .....                                  | 10          |
| 7.3                | Thermal energy balance .....                          | 11          |
| 7.4                | Energy balance of electrical generation .....         | 12          |
| 7.5                | Recycled energy .....                                 | 13          |
| 8                  | Measurement method .....                              | 13          |
| 8.1                | General .....   | 13          |
| 8.2                | Fuel .....  | 13          |
| 8.3                | Atomization agent .....                               | 13          |
| 8.4                | Combustion air and exhaust gas .....                  | 14          |
| 8.5                | Products .....  | 14          |
| 8.6                | Temperature of furnace surface .....                  | 16          |
| 8.7                | Furnace inner wall temperature .....                  | 16          |
| 8.8                | Inner furnace pressure .....                          | 16          |
| 8.9                | Cooling water .....                                   | 16          |
| 8.10               | Electrical auxiliary equipment .....                  | 16          |
| 8.11               | Generation of utilities .....                         | 16          |
| 8.12               | Recycled energy .....                                 | 16          |
| 9                  | Calculation .....                                     | 17          |
| 9.1                | General provisions .....                              | 17          |
| 9.2                | Total energy input .....                              | 17          |
| 9.3                | Total energy output .....                             | 18          |

|            |   |           |
