DIN EN 1808:2015-08 (E)

Safety requirements for suspended access equipment - Design calculations, stability criteria, construction - Examinations and tests

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 6

3 Terms and definitions, symbols and abbreviations 6

4 Hazards and preventative actions 23

5 Safety requirements and/or measures 27

6 Structural, stability and mechanical calculations for SAE 27

7 Suspended platforms 47

8 Hoisting systems 57

9 Suspension rigs 66

10 Electrical, hydraulic and pneumatic systems 72

11 Control systems 73

12 Verification and certification 77

13 Marking of SAE 79

14 Accompanying documents 81

Annex A (normative) Platform type-tests 85

Annex B (normative) Hoist and secondary device type-tests 90

Annex C (normative) Suspension rig type-tests 96

Annex D (informative) Guidance on the presentation and interpretation of loads imposed by SAE structures 98

Annex E (informative) Maximum permitted horizontal displacement of platform 101

Annex F (normative) Guidance on the requirements for wireless control systems 105

Annex G (normative) Design requirements for rail tracks, monorail tracks and support systems 107

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC 130
