ISO 11042-1:1996-08 (E)

Gas turbines - Exhaust gas emission - Part 1: Measurement and evaluation

Contents

Page

1 Scope 1

2 Normative references 1

3 Definitions 1

4 Symbols 2

5 Conditions 4
5.1 Gas turbine and fuel 4
5.2 Measured values 4
5.3 Standard conditions 4

6 Measurements 5
6.1 Determination of constituents in exhaust gas 5
6.2 Guideline for the arrangement of the measurement system 5
6.3 Performing the test, test report, evaluation 6

7 Instrumentation 8
7.1 Types of measuring device 8
7.2 Specification for NO;,, analysers 8
7.3 Specification for CO and CO2 analysers 9
7.4 Specification for sulfur oxides analysers 10
7.5 Specification for unburned and partially burned hydrocarbons analysers 11
7.6 Specification for ammonia analysers 12
7.7 Specification for oxygen analysers 13
7.8 Specification for smoke analysers 15
7.9 Specification for solid particle analysers 16

8 Quality of measurement 23
8.1 Preamble 23
8.2 Methods for calibration 23

9 Conversion of data 23
9.1 General 23
9.2 Conversion between wet and dry exhaust gas 24
9.3 Conversion to the particular exhaust gas oxygen level 24
9.4 Conversion to the constituent mass flow related to the dry exhaust gas volume flow at normal conditions and to a specific oxygen content 24
9.5 Conversion to power Output related values 24
9.6 Conversion to consumed fuel energy related values 24

Annexes A Typical example of test results and their evaluation 25

B Information regarding the major constituents of the exhaust gas 29

C Physical properties of gaseous constituents 30

D Bibliography 33
