Lifts (elevators) - Requirements for lifts used to assist in building evacuation

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Automaticevacuationliftspecification 3
4.1 Determining the number and size of lifts 3
4.2 Protection of lift equipment 3
4.3 Waiting and travelling environment for users 4
4.4 Removal or suspension of lifts from evacuation service 4
4.5 Lift system reliability 4
4.6 Automatic recovery system 4
4.7 Remote lift car surveillance 5
4.8 Communication system requirements 5
4.9 Lift signs and passenger announcements 6
4.10 Prevention and detection of car overloading 6
4.11 Initiation of evacuation service 6
4.12 Description of evacuation service 6
4.13 Removal of lifts cars from service 8
4.14 Change of main evacuation exit floor (MEEF) 9
4.15 Cancellation of evacuation service 9

5 Information to be provided to the building owner 9

6 Other information to be provided 10

Annex A (informative) Building design considerations for automatic lift evacuationspecification 11

Annex B (informative) Information to be provided 19
