DIN EN ISO 16170:2017-05 (E)

In situ test methods for high efficiency filter systems in industrial facilities (ISO 16170:2016)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **7**

2 Normative references ... **8**

3 Terms and definitions ... **8**

4 Principle of the method ... **10**

5 Prerequisites ... **12**
5.1 Filter initial characterization ... 12
5.2 Preparatory conditions ... 12
5.2.1 General ... 12
5.2.2 Choice of injection and sampling locations ... 13
5.2.3 Conditions for the ventilation systems on which the test is performed ... 13
5.2.4 Climatic conditions in the rooms where the injection/sampling is performed ... 13
5.2.5 Apparatus selection and preparation ... 14
5.2.6 Qualification of the test personnel ... 16
5.2.7 Health and safety ... 16
5.2.8 Test conditions ... 17

6 Test sequence ... **17**
6.1 Evaluation of filtration system under test ... 17
6.2 Preparation of test equipment ... 18
6.3 Preparation of log sheets ... 18
6.4 Monitoring of climatic conditions ... 18
6.5 Aerosol generation setup ... 18
6.6 Sampling equipment setup ... 18
6.7 Monitoring of upstream challenge ... 18
6.8 Monitoring of downstream ... 19
6.9 Test performance ... 19
6.10 Calculations ... 19

7 Evaluation and report ... **20**

Annex A (informative) **Aerosol candidates for *in situ* testing** ... **22**

Annex B (normative) **Integrity testing — Typical methodology using dispersed oil test aerosols** ... **23**

Annex C (normative) **Efficiency accountancy testing — Uranine test method** ... **32**

Annex D (informative) **Leakage test methods** ... **39**

Annex E (informative) **Guideline for representative sampling** ... **40**

Bibliography ... **42**
