

ISO 19859:2016-06 (E)

Gas turbine applications - Requirements for power generation

Contents		Page
Foreword		xii
Introduction		xiii
1	Scope	1
2	Normative references	2
3	Terms and definitions	8
4	Comparative performance assessment at standard reference conditions	12
4.1	General	12
4.2	Standard reference conditions	13
4.2.1	General	13
4.2.2	Ambient conditions	13
4.2.3	Exhaust conditions	13
4.2.4	Cooling water conditions (if applicable)	13
4.2.5	Working fluid heater or cooler	13
4.2.6	Fuel for comparative performance assessment	13
5	Performance at site conditions	14
5.1	Site rating	14
5.1.1	Site rated power	14
5.1.2	Site minimum load	14
5.1.3	Site net heat rate	14
5.1.4	Site peak load	14
5.2	Site conditions	14
5.3	Corrections	15
6	Site conditions and utilities	15
6.1	Air quality	15
6.2	Water quality	16
6.3	Steam quality	16
6.4	Purge media quality	16
6.5	Interface and utility connection points	17
6.6	Gas turbine orientation due to site conditions	17
7	Discharges and emissions to the environment	18
7.1	General	18
7.2	Design philosophy for prevention of unplanned release of fluids	18
7.3	Noise emissions	18
7.3.1	General	18
7.3.2	Methods for sound measurements and predictions	18
7.3.3	Sound level within the gas turbine enclosure	19
7.4	Exhaust emissions	19
7.4.1	General	19
7.4.2	Responsibilities	19
7.4.3	Reporting emissions	19
7.4.4	Start-up emissions	20
7.5	Post-combustion controls	20
7.6	Emission monitoring	20
7.7	Water, steam and other emissions	20

7.8	Visible plumes	20
8	Contract fuels	21
8.1	General	21
8.2	Types (gas, liquids and combination)	21
8.3	Fuel composition	21
8.4	Fuel supply requirements	22
8.5	Alternative fuels (syngas, low calorific value gas, LPG, NGL, Naphtha, LNG, high hydrogen and residual fuel oil)	22
9	Fuel systems and treatment	23
9.1	General requirements	23
9.2	Gas fuel supply	23
9.3	Liquid fuel supply	23
9.4	Fuel filter/separator	24
9.4.1	Gas fuel	24
9.4.2	Liquid fuel	24
9.5	Pre-heating requirements for the dew point control of fuel gas	24
9.6	Pre-heating requirements for liquid fuels approaching their pour point	24
9.7	Alternative fuels - multi-fuel capability	24
9.8	Mixed fuel co-firing	25
9.9	Fuel for igniter	25
9.10	Start-up fuel, main fuel and fuel changeover	25
9.11	Water and steam injection systems	25
9.12	Fuel purge, vents and drains	25
9.13	Fuel system metering	25
9.14	Fuel system pipework and vessels design	26
9.14.1	General	26
9.14.2	Fuel pipes, joints and flanges	26
9.14.3	Flexible pipes	26
10	Regulations, codes and standards	26
10.1	General requirements	26
10.2	Design codes and standards	27
10.3	Verification	27
11	Operating requirements	28
11.1	General requirements	28
11.2	Operating range and limitations	28
11.3	Starts (time to start, number of starts, start restrictions)	28
11.4	Loading/de-loading	29
11.5	Grid operational requirements	29
11.6	Frequency response	30
11.7	Location of controls HMI	30
11.8	Operation documents	30
11.9	Island mode operation and black start	30
11.10	Black start and black grid restoration	31
12	Quality	31
12.1	Quality management system	31
12.1.1	General	31
12.1.2	Project quality manager	31
12.1.3	Project quality plan	31
12.1.4	Quality control plan	32
12.1.5	Inspection and test plan	32
12.2	Quality monitoring and approval	32
12.2.1	Sub-suppliers and supply chain quality monitoring	32
12.2.2	Quality surveillance by the Purchaser	33
12.2.3	Equipment approvals of statutory and coded items	33
12.2.4	Quality control record	33
12.2.5	Control of non-conforming products and services	33

12.2.6	Concessions	33
12.2.7	Project design reviews	34
13	Reliability, availability and maintainability	34
13.1	Basic RAM assessment	34
13.1.1	General	34
13.1.2	Reliability	34
13.1.3	Starting reliability	35
13.1.4	Availability	36
13.1.5	Maintainability	36
13.1.6	Spares holding	37
13.1.7	Operating logs	37
13.2	Additional RAM requirements	38
13.2.1	General requirements	38
13.2.2	Forced outage factor and equivalent forced outage factor	38
13.2.3	Equivalent availability factor	39
13.2.4	Equivalent operating hours	41
14	Safety requirements	41
14.1	General	41
14.2	Risk assessment	41
14.3	Fire precautions	41
14.3.1	General	41
14.3.2	Enclosure fire precautions	42
14.3.3	Gas turbine hall fire precautions	42
14.4	Hazardous area classification and explosion prevention and protection	42
14.5	Flammable gas detection	42
14.6	Heat detectors	42
14.7	Smoke detection	42
14.8	Enclosed space access	42
14.9	Containment and rupture	43
14.10	Hydraulically operated safety equipment	43
14.11	Fuel system pressure testing	43
14.12	Clutch	43
14.13	Functional safety	43
14.14	Hazardous material	43
14.15	Overspeed protection system testing	44
14.16	Manual isolation features	44
14.17	Hazard identification and operability studies	44
15	Measurement, language, identification and standardization	45
15.1	Units of measurement	45
15.2	Language	45
15.2.1	General	45
15.2.2	Language for communication	45
15.2.3	Language for documentation	45
15.2.4	Language for HMI display screens	45
15.2.5	Language for labelling and signs	45
15.3	Equipment identification system, nameplates and labels	46
15.4	Standardization and interchangeability	46
16	Corrosion prevention, painting and finishing	47
16.1	General requirements	47
16.2	Painting and coating	47
16.2.1	General	47
16.2.2	Type of exposure	47
16.2.3	Visual assessment of workmanship of surface	48
16.2.4	Preparation of the surface	49
16.2.5	Application procedures	49
16.2.6	Paint materials	49
16.2.7	Galvanized coatings	49
16.2.8	Inspections and tests	50

16.3	Galvanic effects	50
17	Packing and transportation	50
17.1	Preparation	50
17.2	Packing	51
17.3	Transportation	52
18	Gas turbine core	52
18.1	Design requirements	52
18.1.1	Life (hours and weighted hours, starts, cyclic events)	52
18.1.2	Mechanical design shaft power limitations	53
18.1.3	Radial and axial clearances and control	53
18.1.4	Compressor	53
18.1.5	Turbine	54
18.1.6	Combustor	55
18.1.7	Casings	56
18.1.8	Rotor	56
18.1.9	Rotor standstill corrosion protection	57
18.1.10	Rotor overspeed capability	57
18.1.11	Vibration and dynamics	57
18.2	Vibration acceptance limits	58
18.2.1	General	58
18.2.2	Measurements on rotating shafts	59
18.2.3	Measurements on non-rotating parts	59
18.3	Balance quality	60
18.3.1	Balance planes	60
18.3.2	Balancing general	60
18.3.3	Low speed balancing	60
18.3.4	High speed balancing	60
18.4	Bearings and supports	61
18.5	Modified cycles	61
18.5.1	General	61
18.5.2	External air coolers and direct steam cooling	61
19	Gearboxes and couplings	62
19.1	Load gearbox	62
19.2	Auxiliary gears	62
19.3	Balancing and vibration	62
19.4	Main drive shaft couplings	63
19.4.1	General	63
19.4.2	Main drive flexible couplings - speeds not exceeding 4 000 r/min	63
19.4.3	Main drive flexible couplings - speeds exceeding 4 000 r/min	63
19.4.4	Quill shaft main drive flexible couplings	64
19.4.5	Rigid couplings	64
19.4.6	Over-torque devices	64
19.4.7	Coupling guards	64
20	Air inlet system	65
20.1	General	65
20.2	Air filter	65
20.3	Inlet filter house	66
20.4	Water removal systems	67
20.5	Inlet cooling systems	67
20.6	Inlet ducts and silencer	68
20.7	Resonance of ducts, silencer or turning baffles	68
20.8	Materials, fixings cladding and sealing	69
20.9	Isolation flaps and roller shutters	69
20.10	Anti-icing	70
20.10.1	General	70
20.10.2	Compressor bleed anti-icing heating (static filter)	70
20.10.3	Electric infrared heating (static filter)	70
20.10.4	Inlet coils steam or hot water heating	70

20.10.5	Electrical resistance heating	70
20.10.6	Pulse clean filters	70
20.10.7	Inlet heating fire protection and access limitations	71
21	Exhaust system	71
21.1	General	71
21.2	Interface between gas turbine and exhaust system	72
21.3	Design requirements	72
21.4	Mechanical requirements	73
21.5	Insulation	73
21.6	Noise requirements and silencers	73
21.7	Safety requirements	73
21.8	Diverter damper	74
21.9	Exhaust stack	74
22	Civil design and foundation requirements	75
22.1	General	75
22.2	Basis of design	75
22.2.1	General	75
22.2.2	Allowable bearing capacity	75
22.2.3	Foundations, settlements and deflections	75
22.2.4	Levelling datum(s)	76
23	Generator design interface requirements	76
23.1	Electrical fault torque	76
23.2	Matching of the generator to gas turbine	76
23.3	Generator overspeed	76
23.4	Starting device	77
24	Heat recovery steam generation design interface	77
25	Combined cycle applications	78
25.1	General	78
25.2	Gas turbines in combined cycle applications	78
25.3	Single-shaft arrangements start restrictions	79
25.3.1	General	79
25.3.2	Single-shaft rotor train - with clutch	79
25.3.3	Single-shaft rotor train - no clutch	79
26	Control and instrumentation requirements	80
26.1	Control	80
26.1.1	General requirements	80
26.1.2	Architecture	80
26.1.3	Human machine interfacing (HMI)	80
26.1.4	Alarm and annunciation	81
26.1.5	Starting	81
26.1.6	Sequence control	81
26.1.7	Governing and limiting	82
26.1.8	Unloading and shutdown	83
26.1.9	Automation	84
26.2	Instrumentation and associated equipment	85
26.2.1	General	85
26.2.2	Operability and diagnostics	85
26.2.3	Control equipment and instruments	85
26.2.4	Gauges	86
26.2.5	Solenoid valves	86
26.2.6	Vibration monitoring and axial position equipment	86
26.2.7	Actuators	87
26.2.8	Trace heating	87
26.3	Cabling and control panel installation	88
26.3.1	General	88
26.3.2	Cabling	88

26.4	Electrical C&I equipment	89
26.4.1	General	89
26.4.2	Electrical supplies and other services	89
26.4.3	Spare termination	89
26.5	Power supplies	90
26.5.1	General	90
26.5.2	Power supply sizing	90
26.5.3	Intrinsically safe power supplies	90
26.5.4	Battery systems	91
26.5.5	UPS systems	91
26.6	Electrical/electronic equipment protection	91
26.6.1	Lightning and surge protection	91
26.6.2	Electrostatic discharges (ESD)	91
26.6.3	Electromagnetic compatibility (EMC)	91
26.6.4	Electric arc welding	92
26.6.5	Earthing and bonding	92
26.7	Equipment protection	92
26.7.1	General	92
26.7.2	Protection systems	92
26.7.3	Lubrication system	93
26.7.4	Fuel system	94
26.8	Fire precautions	94
26.8.1	General	94
26.8.2	Fire detection	94
26.8.3	Enclosure fire precautions	94
26.8.4	Gas detection	94
26.8.5	Smoke detection	94
26.9	Emission control	95
26.9.1	General	95
26.9.2	Exhaust emission monitoring	95
26.9.3	Periodic sampling	96
26.10	Hazardous areas and certified equipment	96
26.11	Control and instrumentation - maintenance and spare parts	96
26.11.1	General	96
26.11.2	Equipment access	96
26.12	Data communications	97
26.12.1	General	97
26.12.2	Data acquisition storage system	97
26.13	C&I system commissioning	97
27	Electrical system requirements	98
27.1	General requirements	98
27.2	Design, layout and redundancy	100
27.3	Earthing and lightning protection, equipotential bonding	100
27.4	LV power supply requirements	101
27.5	LV switchgear and control equipment	102
27.6	DC distribution	102
27.7	Battery including battery charger - DC/AC converter	103
27.8	Control system power supply	104
27.9	Conductors, cables and wiring practices general	104
27.10	Conductors, cables and wiring practices outside cabinets	105
27.11	Wiring inside cabinets	105
27.12	Electric motors	105
27.13	Junction boxes and cabinets	106
27.14	Protection against electric shock	106
27.15	Trace heating	106
27.16	Grid codes	106
28	Maintenance requirements	107
28.1	General	107
28.2	Design for maintenance	107
28.3	Maintenance strategy (in situ or at works)	107

28.4	Maintenance planning (scheduled maintenance, scheduled inspections)	107
28.5	Parts repairs and replacement	108
28.5.1	Repair	108
28.5.2	Component lives	108
28.6	Tools	108
28.7	Spares	109
28.7.1	General	109
28.7.2	Strategic spares	109
28.8	Training	109
28.9	Outage maintenance	110
28.9.1	Programmed maintenance	110
28.9.2	Degradation after maintenance period	111
28.9.3	Maintenance scope and planning	111
28.10	Maintenance documentation	111
29	Enclosures	112
29.1	General	112
29.2	Construction	113
29.2.1	General	113
29.2.2	Weatherproofing of enclosure	113
29.2.3	Acoustic and heat insulation	113
29.2.4	Ventilation and explosion prevention and protection	114
29.2.5	Internal heating	115
29.2.6	Lighting	115
29.2.7	Enclosure instrumentation	115
29.2.8	Flooring	116
29.2.9	Personnel doorway design (including access panels)	116
29.3	Access and egress	116
29.3.1	General	116
29.3.2	Enclosure roof access	117
29.4	Maintenance within enclosures	117
29.4.1	General	117
29.4.2	Disassembly of enclosure for maintenance	118
29.5	Platforms and access ways	118
29.6	Mechanical handling and cranes	118
29.6.1	General	118
29.6.2	Mobile crane	119
29.6.3	Fixed installed crane	119
29.7	Laydown and storage	119
29.8	Enclosure fire precautions	119
30	Auxiliary equipment	120
30.1	Barring equipment	120
30.1.1	General	120
30.1.2	Gas turbine barring systems	120
30.1.3	Safety and operational requirements	121
30.2	Starting systems	121
30.2.1	Types	121
30.2.2	General and design requirements	122
30.2.3	Power supply for starting systems	122
30.2.4	Start-up restrictions	123
30.3	Lube oil systems	123
30.3.1	General requirements	123
30.3.2	Design requirements	123
30.3.3	Oil reservoirs and storage tanks	125
30.3.4	Temperature control and heating	125
30.3.5	Coolers	125
30.3.6	Filters and contamination	126
30.3.7	Lube oil selection, type and quality	126
30.3.8	Use of synthetic oil	127
30.3.9	Minimum supervision requirements	127
30.4	Compressor water wash systems	128

30.4.1	General	128
30.4.2	Off-line systems	128
30.4.3	On-line systems	129
30.5	Cooler	129
30.5.1	Interstage cooling	129
30.5.2	Cooling air coolers	129
30.5.3	Water cooling systems	129
30.6	Pipework	130
30.6.1	Piping design code	130
30.6.2	General requirements	130
30.6.3	Testing and certification	130
30.6.4	Hydrostatic testing	130
30.6.5	Non-destructive examination (NDE)	131
30.6.6	Mechanical requirements	131
30.6.7	Joints and connections	131
30.6.8	Corrugated flexible metal hoses and hose assemblies	132
30.6.9	Non-metallic flexible hoses, hose assemblies and end connections	132
30.6.10	Flange connectors	132
30.6.11	Insulation of pipework	132
30.6.12	Trace heating	133
30.6.13	Drains	133
30.6.14	Vents	133
30.6.15	Equipment access	133
30.7	Pressure equipment	134
31	Condition monitoring	134
31.1	General	134
31.2	Vibration monitoring system	134
31.2.1	Introduction and overview	134
31.2.2	On-line vibration analysis systems	134
31.2.3	Off-line vibration analysis system	135
31.3	Data acquisition and trend monitoring	135
31.3.1	General	135
31.3.2	Scope	135
31.3.3	Data-acquisition	135
31.3.4	Trend monitoring system	135
32	Installation and commissioning	136
32.1	Installation	136
32.2	Commissioning	137
33	Verification testing	138
33.1	Scope	138
33.2	Reliability test	138
33.3	Contractual performance tests	139
33.3.1	General	139
33.3.2	Test procedure	139
33.3.3	Measurement uncertainty	140
33.3.4	Tolerances	140
33.3.5	Correction curves	140
33.3.6	Performance degradation	140
33.3.7	ISO TIT values	140
33.4	Noise tests	140
33.5	Emissions test	141
34	Design life	141
35	Technical information and documents	141
35.1	General	141
35.2	Instructions for use	142
35.2.1	General	142
35.2.2	Document format	142

35.3 Document submission stages and responsibility 142
35.4 General documentation 142
Annex A (normative) Use of data sheet requirements and options 144
Bibliography 146
