## Gas turbine applications - Requirements for power generation

---

<b>Contents</b>		<b>Page</b>
Foreword .....		xii
Introduction .....		xiii
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>2</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>8</b>
<b>4</b>	<b>Comparative performance assessment at standard reference conditions .....</b>	<b>12</b>
4.1	General .....	12
4.2	Standard reference conditions .....	13
4.2.1	General .....	13
4.2.2	Ambient conditions .....	13
4.2.3	Exhaust conditions .....	13
4.2.4	Cooling water conditions (if applicable) .....	13
4.2.5	Working fluid heater or cooler .....	13
4.2.6	Fuel for comparative performance assessment .....	13
<b>5</b>	<b>Performance at site conditions .....</b>	<b>14</b>
5.1	Site rating .....	14
5.1.1	Site rated power .....	14
5.1.2	Site minimum load .....	14
5.1.3	Site net heat rate .....	14
5.1.4	Site peak load .....	14
5.2	Site conditions .....	14
5.3	Corrections .....	15
<b>6</b>	<b>Site conditions and utilities .....</b>	<b>15</b>
6.1	Air quality .....	15
6.2	Water quality .....	16
6.3	Steam quality .....	16
6.4	Purge media quality .....	16
6.5	Interface and utility connection points .....	17
6.6	Gas turbine orientation due to site conditions .....	17
<b>7</b>	<b>Discharges and emissions to the environment .....</b>	<b>18</b>
7.1	General .....	18
7.2	Design philosophy for prevention of unplanned release of fluids .....	18
7.3	Noise emissions .....	18
7.3.1	General .....	18
7.3.2	Methods for sound measurements and predictions .....	18
7.3.3	Sound level within the gas turbine enclosure .....	19
7.4	Exhaust emissions .....	19
7.4.1	General .....	19
7.4.2	Responsibilities .....	19
7.4.3	Reporting emissions .....	19
7.4.4	Start-up emissions .....	20
7.5	Post-combustion controls .....	20
7.6	Emission monitoring .....	20
7.7	Water, steam and other emissions .....	20

7.8	Visible plumes .....	20
8	Contract fuels .....	21
8.1	General .....	21
8.2	Types (gas, liquids and combination) .....	21
8.3	Fuel composition .....	21
8.4	Fuel supply requirements .....	22
8.5	Alternative fuels (syngas, low calorific value gas, LPG, NGL, Naphtha, LNG, high hydrogen and residual fuel oil) .....	22
9	Fuel systems and treatment .....	23
9.1	General requirements .....	23
9.2	Gas fuel supply .....	23
9.3	Liquid fuel supply .....	23
9.4	Fuel filter/separator .....	24
9.4.1	Gas fuel .....	24
9.4.2	Liquid fuel .....	24
9.5	Pre-heating requirements for the dew point control of fuel gas .....	24
9.6	Pre-heating requirements for liquid fuels approaching their pour point .....	24
9.7	Alternative fuels - multi-fuel capability .....	24
9.8	Mixed fuel co-firing .....	25
9.9	Fuel for igniter .....	25
9.10	Start-up fuel, main fuel and fuel changeover .....	25
9.11	Water and steam injection systems .....	25
9.12	Fuel purge, vents and drains .....	25
9.13	Fuel system metering .....	25
9.14	Fuel system pipework and vessels design .....	26
9.14.1	General .....	26
9.14.2	Fuel pipes, joints and flanges .....	26
9.14.3	Flexible pipes .....	26
10	Regulations, codes and standards .....	26
10.1	General requirements .....	26
10.2	Design codes and standards .....	27
10.3	Verification .....	27
11	Operating requirements .....	28
11.1	General requirements .....	28
11.2	Operating range and limitations .....	28
11.3	Starts (time to start, number of starts, start restrictions) .....	28
11.4	Loading/de-loading .....	29
11.5	Grid operational requirements .....	29
11.6	Frequency response .....	30
11.7	Location of controls HMI .....	30
11.8	Operation documents .....	30
11.9	Island mode operation and black start .....	30
11.10	Black start and black grid restoration .....	31
12	Quality .....	31
12.1	Quality management system .....	31
12.1.1	General .....	31
12.1.2	Project quality manager .....	31
12.1.3	Project quality plan .....	31
12.1.4	Quality control plan .....	32
12.1.5	Inspection and test plan .....	32
12.2	Quality monitoring and approval .....	32
12.2.1	Sub-suppliers and supply chain quality monitoring .....	32
12.2.2	Quality surveillance by the Purchaser .....	33
12.2.3	Equipment approvals of statutory and coded items .....	33
12.2.4	Quality control record .....	33
12.2.5	Control of non-conforming products and services .....	33

12.2.6	Concessions .....	33
12.2.7	Project design reviews .....	34
13	Reliability, availability and maintainability .....	34
13.1	Basic RAM assessment .....	34
13.1.1	General .....	34
13.1.2	Reliability .....	34
13.1.3	Starting reliability .....	35
13.1.4	Availability .....	36
13.1.5	Maintainability .....	36
13.1.6	Spares holding .....	37
13.1.7	Operating logs .....	37
13.2	Additional RAM requirements .....	38
13.2.1	General requirements .....	38
13.2.2	Forced outage factor and equivalent forced outage factor .....	38
13.2.3	Equivalent availability factor .....	39
13.2.4	Equivalent operating hours .....	41
14	Safety requirements .....	41
14.1	General .....	41
14.2	Risk assessment .....	41
14.3	Fire precautions .....	41
14.3.1	General .....	41
14.3.2	Enclosure fire precautions .....	42
14.3.3	Gas turbine hall fire precautions .....	42
14.4	Hazardous area classification and explosion prevention and protection .....	42
14.5	Flammable gas detection .....	42
14.6	Heat detectors .....	42
14.7	Smoke detection .....	42
14.8	Enclosed space access .....	42
14.9	Containment and rupture .....	43
14.10	Hydraulically operated safety equipment .....	43
14.11	Fuel system pressure testing .....	43
14.12	Clutch .....	43
14.13	Functional safety .....	43
14.14	Hazardous material .....	43
14.15	Overspeed protection system testing .....	44
14.16	Manual isolation features .....	44
14.17	Hazard identification and operability studies .....	44
15	Measurement, language, identification and standardization .....	45
15.1	Units of measurement .....	45
15.2	Language .....	45
15.2.1	General .....	45
15.2.2	Language for communication .....	45
15.2.3	Language for documentation .....	45
15.2.4	Language for HMI display screens .....	45
15.2.5	Language for labelling and signs .....	45
15.3	Equipment identification system, nameplates and labels .....	46
15.4	Standardization and interchangeability .....	46
16	Corrosion prevention, painting and finishing .....	47
16.1	General requirements .....	47
16.2	Painting and coating .....	47
16.2.1	General .....	47
16.2.2	Type of exposure .....	47
16.2.3	Visual assessment of workmanship of surface .....	48
16.2.4	Preparation of the surface .....	49
16.2.5	Application procedures .....	49
16.2.6	Paint materials .....	49
16.2.7	Galvanized coatings .....	49
16.2.8	Inspections and tests .....	50

16.3	Galvanic effects .....	50
17	Packing and transportation .....	50
17.1	Preparation .....	50
17.2	Packing .....	51
17.3	Transportation .....	52
18	Gas turbine core .....	52
18.1	Design requirements .....	52
18.1.1	Life (hours and weighted hours, starts, cyclic events) .....	52
18.1.2	Mechanical design shaft power limitations .....	53
18.1.3	Radial and axial clearances and control .....	53
18.1.4	Compressor .....	53
18.1.5	Turbine .....	54
18.1.6	Combustor .....	55
18.1.7	Casings .....	56
18.1.8	Rotor .....	56
18.1.9	Rotor standstill corrosion protection .....	57
18.1.10	Rotor overspeed capability .....	57
18.1.11	Vibration and dynamics .....	57
18.2	Vibration acceptance limits .....	58
18.2.1	General .....	58
18.2.2	Measurements on rotating shafts .....	59
18.2.3	Measurements on non-rotating parts .....	59
18.3	Balance quality .....	60
18.3.1	Balance planes .....	60
18.3.2	Balancing general .....	60
18.3.3	Low speed balancing .....	60
18.3.4	High speed balancing .....	60
18.4	Bearings and supports .....	61
18.5	Modified cycles .....	61
18.5.1	General .....	61
18.5.2	External air coolers and direct steam cooling .....	61
19	Gearboxes and couplings .....	62
19.1	Load gearbox .....	62
19.2	Auxiliary gears .....	62
19.3	Balancing and vibration .....	62
19.4	Main drive shaft couplings .....	63
19.4.1	General .....	63
19.4.2	Main drive flexible couplings - speeds not exceeding 4 000 r/min .....	63
19.4.3	Main drive flexible couplings - speeds exceeding 4 000 r/min .....	63
19.4.4	Quill shaft main drive flexible couplings .....	64
19.4.5	Rigid couplings .....	64
19.4.6	Over-torque devices .....	64
19.4.7	Coupling guards .....	64
20	Air inlet system .....	65
20.1	General .....	65
20.2	Air filter .....	65
20.3	Inlet filter house .....	66
20.4	Water removal systems .....	67
20.5	Inlet cooling systems .....	67
20.6	Inlet ducts and silencer .....	68
20.7	Resonance of ducts, silencer or turning baffles .....	68
20.8	Materials, fixings cladding and sealing .....	69
20.9	Isolation flaps and roller shutters .....	69
20.10	Anti-icing .....	70
20.10.1	General .....	70
20.10.2	Compressor bleed anti-icing heating (static filter) .....	70
20.10.3	Electric infrared heating (static filter) .....	70
20.10.4	Inlet coils steam or hot water heating .....	70

20.10.5	Electrical resistance heating .....	70
20.10.6	Pulse clean filters .....	70
20.10.7	Inlet heating fire protection and access limitations .....	71
21	Exhaust system .....	71
21.1	General .....	71
21.2	Interface between gas turbine and exhaust system .....	72
21.3	Design requirements .....	72
21.4	Mechanical requirements .....	73
21.5	Insulation .....	73
21.6	Noise requirements and silencers .....	73
21.7	Safety requirements .....	73
21.8	Diverter damper .....	74
21.9	Exhaust stack .....	74
22	Civil design and foundation requirements .....	75
22.1	General .....	75
22.2	Basis of design .....	75
22.2.1	General .....	75
22.2.2	Allowable bearing capacity .....	75
22.2.3	Foundations, settlements and deflections .....	75
22.2.4	Levelling datum(s) .....	76
23	Generator design interface requirements .....	76
23.1	Electrical fault torque .....	76
23.2	Matching of the generator to gas turbine .....	76
23.3	Generator overspeed .....	76
23.4	Starting device .....	77
24	Heat recovery steam generation design interface .....	77
25	Combined cycle applications .....	78
25.1	General .....	78
25.2	Gas turbines in combined cycle applications .....	78
25.3	Single-shaft arrangements start restrictions .....	79
25.3.1	General .....	79
25.3.2	Single-shaft rotor train - with clutch .....	79
25.3.3	Single-shaft rotor train - no clutch .....	79
26	Control and instrumentation requirements .....	80
26.1	Control .....	80
26.1.1	General requirements .....	80
26.1.2	Architecture .....	80
26.1.3	Human machine interfacing (HMI) .....	80
26.1.4	Alarm and annunciation .....	81
26.1.5	Starting .....	81
26.1.6	Sequence control .....	81
26.1.7	Governing and limiting .....	82
26.1.8	Unloading and shutdown .....	83
26.1.9	Automation .....	84
26.2	Instrumentation and associated equipment .....	85
26.2.1	General .....	85
26.2.2	Operability and diagnostics .....	85
26.2.3	Control equipment and instruments .....	85
26.2.4	Gauges .....	86
26.2.5	Solenoid valves .....	86
26.2.6	Vibration monitoring and axial position equipment .....	86
26.2.7	Actuators .....	87
26.2.8	Trace heating .....	87
26.3	Cabling and control panel installation .....	88
26.3.1	General .....	88
26.3.2	Cabling .....	88

26.4	Electrical C&I equipment .....	89
26.4.1	General .....	89
26.4.2	Electrical supplies and other services .....	89
26.4.3	Spare termination .....	89
26.5	Power supplies .....	90
26.5.1	General .....	90
26.5.2	Power supply sizing .....	90
26.5.3	Intrinsically safe power supplies .....	90
26.5.4	Battery systems .....	91
26.5.5	UPS systems .....	91
26.6	Electrical/electronic equipment protection .....	91
26.6.1	Lightning and surge protection .....	91
26.6.2	Electrostatic discharges (ESD) .....	91
26.6.3	Electromagnetic compatibility (EMC) .....	91
26.6.4	Electric arc welding .....	92
26.6.5	Earthing and bonding .....	92
26.7	Equipment protection .....	92
26.7.1	General .....	92
26.7.2	Protection systems .....	92
26.7.3	Lubrication system .....	93
26.7.4	Fuel system .....	94
26.8	Fire precautions .....	94
26.8.1	General .....	94
26.8.2	Fire detection .....	94
26.8.3	Enclosure fire precautions .....	94
26.8.4	Gas detection .....	94
26.8.5	Smoke detection .....	94
26.9	Emission control .....	95
26.9.1	General .....	95
26.9.2	Exhaust emission monitoring .....	95
26.9.3	Periodic sampling .....	96
26.10	Hazardous areas and certified equipment .....	96
26.11	Control and instrumentation - maintenance and spare parts .....	96
26.11.1	General .....	96
26.11.2	Equipment access .....	96
26.12	Data communications .....	97
26.12.1	General .....	97
26.12.2	Data acquisition storage system .....	97
26.13	C&I system commissioning .....	97
27	Electrical system requirements .....	98
27.1	General requirements .....	98
27.2	Design, layout and redundancy .....	100
27.3	Earthing and lightning protection, equipotential bonding .....	100
27.4	LV power supply requirements .....	101
27.5	LV switchgear and control equipment .....	102
27.6	DC distribution .....	102
27.7	Battery including battery charger - DC/AC converter .....	103
27.8	Control system power supply .....	104
27.9	Conductors, cables and wiring practices general .....	104
27.10	Conductors, cables and wiring practices outside cabinets .....	105
27.11	Wiring inside cabinets .....	105
27.12	Electric motors .....	105
27.13	Junction boxes and cabinets .....	106
27.14	Protection against electric shock .....	106
27.15	Trace heating .....	106
27.16	Grid codes .....	106
28	Maintenance requirements .....	107
28.1	General .....	107
28.2	Design for maintenance .....	107
28.3	Maintenance strategy (in situ or at works) .....	107

28.4	Maintenance planning (scheduled maintenance, scheduled inspections) .....	107
28.5	Parts repairs and replacement .....	108
28.5.1	Repair .....	108
28.5.2	Component lives .....	108
28.6	Tools .....	108
28.7	Spares .....	109
28.7.1	General .....	109
28.7.2	Strategic spares .....	109
28.8	Training .....	109
28.9	Outage maintenance .....	110
28.9.1	Programmed maintenance .....	110
28.9.2	Degradation after maintenance period .....	111
28.9.3	Maintenance scope and planning .....	111
28.10	Maintenance documentation .....	111
29	Enclosures .....	112
29.1	General .....	112
29.2	Construction .....	113
29.2.1	General .....	113
29.2.2	Weatherproofing of enclosure .....	113
29.2.3	Acoustic and heat insulation .....	113
29.2.4	Ventilation and explosion prevention and protection .....	114
29.2.5	Internal heating .....	115
29.2.6	Lighting .....	115
29.2.7	Enclosure instrumentation .....	115
29.2.8	Flooring .....	116
29.2.9	Personnel doorway design (including access panels) .....	116
29.3	Access and egress .....	116
29.3.1	General .....	116
29.3.2	Enclosure roof access .....	117
29.4	Maintenance within enclosures .....	117
29.4.1	General .....	117
29.4.2	Disassembly of enclosure for maintenance .....	118
29.5	Platforms and access ways .....	118
29.6	Mechanical handling and cranes .....	118
29.6.1	General .....	118
29.6.2	Mobile crane .....	119
29.6.3	Fixed installed crane .....	119
29.7	Laydown and storage .....	119
29.8	Enclosure fire precautions .....	119
30	Auxiliary equipment .....	120
30.1	Barring equipment .....	120
30.1.1	General .....	120
30.1.2	Gas turbine barring systems .....	120
30.1.3	Safety and operational requirements .....	121
30.2	Starting systems .....	121
30.2.1	Types .....	121
30.2.2	General and design requirements .....	122
30.2.3	Power supply for starting systems .....	122
30.2.4	Start-up restrictions .....	123
30.3	Lube oil systems .....	123
30.3.1	General requirements .....	123
30.3.2	Design requirements .....	123
30.3.3	Oil reservoirs and storage tanks .....	125
30.3.4	Temperature control and heating .....	125
30.3.5	Coolers .....	125
30.3.6	Filters and contamination .....	126
30.3.7	Lube oil selection, type and quality .....	126
30.3.8	Use of synthetic oil .....	127
30.3.9	Minimum supervision requirements .....	127
30.4	Compressor water wash systems .....	128

30.4.1	General .....	128
30.4.2	Off-line systems .....	128
30.4.3	On-line systems .....	129
30.5	Cooler .....	129
30.5.1	Interstage cooling .....	129
30.5.2	Cooling air coolers .....	129
30.5.3	Water cooling systems .....	129
30.6	Pipework .....	130
30.6.1	Piping design code .....	130
30.6.2	General requirements .....	130
30.6.3	Testing and certification .....	130
30.6.4	Hydrostatic testing .....	130
30.6.5	Non-destructive examination (NDE) .....	131
30.6.6	Mechanical requirements .....	131
30.6.7	Joints and connections .....	131
30.6.8	Corrugated flexible metal hoses and hose assemblies .....	132
30.6.9	Non-metallic flexible hoses, hose assemblies and end connections .....	132
30.6.10	Flange connectors .....	132
30.6.11	Insulation of pipework .....	132
30.6.12	Trace heating .....	133
30.6.13	Drains .....	133
30.6.14	Vents .....	133
30.6.15	Equipment access .....	133
30.7	Pressure equipment .....	134
31	Condition monitoring .....	134
31.1	General .....	134
31.2	Vibration monitoring system .....	134
31.2.1	Introduction and overview .....	134
31.2.2	On-line vibration analysis systems .....	134
31.2.3	Off-line vibration analysis system .....	135
31.3	Data acquisition and trend monitoring .....	135
31.3.1	General .....	135
31.3.2	Scope .....	135
31.3.3	Data-acquisition .....	135
31.3.4	Trend monitoring system .....	135
32	Installation and commissioning .....	136
32.1	Installation .....	136
32.2	Commissioning .....	137
33	Verification testing .....	138
33.1	Scope .....	138
33.2	Reliability test .....	138
33.3	Contractual performance tests .....	139
33.3.1	General .....	139
33.3.2	Test procedure .....	139
33.3.3	Measurement uncertainty .....	140
33.3.4	Tolerances .....	140
33.3.5	Correction curves .....	140
33.3.6	Performance degradation .....	140
33.3.7	ISO TIT values .....	140
33.4	Noise tests .....	140
33.5	Emissions test .....	141
34	Design life .....	141
35	Technical information and documents .....	141
35.1	General .....	141
35.2	Instructions for use .....	142
35.2.1	General .....	142
35.2.2	Document format .....	142

**35.3 Document submission stages and responsibility ..... 142**  
**35.4 General documentation ..... 142**  
**Annex A (normative) Use of data sheet requirements and options ..... 144**  
**Bibliography ..... 146**
