

ISO 21018-4:2016-10 (E)

Hydraulic fluid power - Monitoring the level of particulate contamination in the fluid - Part 4: Use of the light extinction technique

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Health and safety	2
5	Equipment	2
5.1	General	2
5.2	Equipment for online and off-line calibration and verification	2
6	Operating procedures	3
6.1	General	3
6.2	Operating from a pressurized line for the field contamination monitor	4
6.2.1	General	4
6.2.2	Procedure	4
6.3	Operating from a system reservoir for the field contamination monitor	4
6.3.1	General	4
6.3.2	Procedure	5
6.4	Operating from a bulk container for the field contamination monitor	5
6.4.1	General	5
6.4.2	Procedure	6
6.5	Operating from a sample bottle for the field contamination monitor	6
6.5.1	General	6
6.5.2	Procedure	7
7	Calibration and verification procedure	7
7.1	General principles	7
7.2	Required equipment	7
7.3	Determination of particle concentration limits	7
7.4	Calibration	8
8	Reporting of results of calibration and verification procedure	9
9	Test report	10
10	Identification statement	10
