

ISO 15746-2:2017-10 (E)

Automation systems and integration - Integration of advanced process control and optimization capabilities for manufacturing systems - Part 2: Activity models and information exchange

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	3
5	APC-O workflow	4
5.1	Lifecycle concepts	4
5.2	Development phase	7
5.3	Execution phase	7
5.3.1	Execution workflow	7
5.3.2	Distributed APC-O system	9
5.4	Support phase	10
6	Information exchange	11
6.1	Overview of information exchange services	11
6.2	Information model	12
6.2.1	General	12
6.2.2	Properties of APC-O event type	14
6.2.3	Properties of APC-O variable type	15
6.2.4	Module definition types	16
6.3	Non APC-O system interfaces	17
6.3.1	General	17
6.3.2	Level 2 data and events	17
6.3.3	Level 3 data and events	22
6.4	Intersystem and intrasystem interfaces	22
6.4.1	General	22
6.4.2	APC-O data and events	23
6.4.3	APC-O module definitions	26
6.4.4	Variable source type	33
Annex A (informative)	APC-O Event Set Example	34
Annex B (informative)	Object Process Language (OPL)	36
Bibliography		43
