## Vacuum technology - Vacuum gauges - Characterization of quadrupole mass spectrometers for partial pressure measurement

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	2
3	Terms and definitions .....	2
4	Symbols and abbreviated terms .....	3
5	Parameters for which characterization is required or recommended for the different applications .....	4
5.1	General .....	4
5.2	General characterization of the QMS .....	5
5.3	Leak rate measurement and leak rate monitoring (helium leak) .....	5
5.4	Leak rate monitoring (air leak) .....	5
5.5	Leak rate monitoring (water leak) .....	6
5.6	Residual gas analysis .....	6
5.7	Outgassing rate measurement .....	7
6	Vacuum systems to characterize QMS .....	7
6.1	General .....	7
6.2	Vacuum system for characterization with single gas .....	8
6.2.1	Continuous expansion system (orifice flow system) .....	8
6.2.2	Calibration system according to ISO 3567:2012 .....	8
6.2.3	In situ calibration system .....	8
6.3	Vacuum system for characterization with gas mixtures .....	9
6.3.1	Continuous expansion system (orifice flow system) .....	9
6.3.2	In situ calibration system for gas mixture .....	10
7	Characterization and calibration procedures .....	10
7.1	General .....	10
7.2	Mass resolution .....	11
7.3	Minimum detectable partial pressure (pMDPP) .....	12
7.4	Minimum detectable concentration (CMDc) .....	13
7.5	Dynamic range .....	13
7.6	Sensitivity and interference effect ratio .....	14
7.7	Linear response range .....	15
7.8	Relative sensitivity factor .....	15
7.9	Fragmentation pattern (cracking pattern) .....	16
7.10	Outgassing rate of QMS .....	16
7.11	Pumping speed of QMS .....	17
8	Measurement uncertainties .....	17
8.1	General .....	17
8.2	Uncertainty of mass resolution .....	18
8.3	Uncertainty of pMDPP .....	18
8.4	Uncertainty of minimum detectable concentration (CMDc) .....	18
8.5	Uncertainty of dynamic range .....	18

8.6	Uncertainty of sensitivity .....	18
8.7	Uncertainty of linear response range .....	18
8.8	Uncertainty of relative sensitivity factor .....	18
8.9	Uncertainty of fragmentation factor .....	18
8.10	Uncertainties of outgassing rate and pumping speed .....	19
8.11	Long-term stability of characteristic parameters of QMS .....	19
9	Reporting results .....	19
Annex A (informative) Estimate of gas composition in the measurement chamber from known gas composition in the reservoir in front of a leak element under different flowconditions .....		21
Bibliography .....		23
